Java Workshop Programming Steven Holzner, 1996. Java has taken the Internet programming community by storm. But writing Java code is not easy, at least in part, because programmers have had to contend with a command line compiler to create applets. Now Sun Microsystems, the creator of Java, development work inside HTML pages, the environment of the World Wide Web. *Java Workshop* brings the familiarity of an HTML page environment to Java programmers. Developers will now be able to code, compile, and debug their applets from a Web browser, seeing what they're building as they write. This book combines a Java tutorial with an introduction to the *Java Workshop* programming environment. You will learn to create the items that Web programmers most want to incorporate into their Web pages.
