Project management needs to become part of the business. This book addresses the concepts and issues of business project management. It aims to assist organisations in making the shift from a narrow strong technical focus on project management to a broader more business oriented focus. The Practice of Project Management introduces three basic concepts which underpin the philosophy of the business oriented approach: Business Focused Project Management (BFPM) which takes an organisation wide view, The Wrappers Model and Objective Directed Project Management (ODPM) both of which provide the philosophies, processes, concepts and tools used to enable BFPM.
