The Sleep of Others and the Transformation of Sleep Research Kenton Kroker,2007-12-15 We tend to think of sleep as a private concern a night time retreat from the physical world into the realm of the subconscious Yet sleep also has a public side it has been the focal point of religious ritual philosophic speculation political debate psychological research and more recently neuroscientific investigation and medical practice In this first ever history of sleep research Kenton Kroker draws on a wide range of material to present the story of how an investigative field at one time dominated by the study of dreams slowly morphed into a laboratory based discipline The result of this transformation Kroker argues has changed the very meaning of sleep from its earlier conception to an issue for public health and biomedical intervention Examining a vast historical period of 2500 years Kroker separates the problems associated with the history of dreaming from those associated with sleep itself and charts sleep related diseases such as narcolepsy insomnia and sleep apnea He describes the discovery of rapid eye movement REM during the 1950s and shows how this discovery initiated the creation of dream laboratories that later emerged as centres for sleep research during the 1960s and 1970s Kroker s work is unique in subject and scope and will be enormously useful for both sleep researchers medical historians and anybody who s ever lost a night s sleep

Environmental Humanities and the Uncanny Rod Giblett, 2019-04-12 Sigmund Freud's essay *The Uncanny* is celebrating a century since publication. It is arguably his greatest and most fruitful contribution to the study of culture and the environment. *Environmental Humanities and the Uncanny* brings into the open neglected aspects of the uncanny in this famous essay in its centenary year and in the work of those before and after him such as Friedrich Schelling, Walter Benjamin, E. T. A. Hoffmann, and Bram Stoker. This book does so by focussing on religion, especially at a time and for a world in which some sectors of the monotheisms are in aggressive and sometimes violent contention against those of other monotheisms and even against other sectors within their own monotheism. The chapter on Schelling's uncanny argues that monotheisms come out of polytheism and makes the plea for polytheism central to the whole book. It enables rethinking the relationships between mythology and monotheistic and polytheistic religions in a culturally and politically liberatory and progressive way. Succeeding chapters consider the uncanny cyborg, the uncanny and the fictional, and the uncanny and the Commonwealth, concluding with a chapter on Taoism as a polytheistic religion. Building on the author's previous work in *Environmental Humanities and Theologies* in bringing together theories of religion and the environment, this book will be of great interest to students and scholars of the environmental humanities, ecocultural studies, and religion.
