Sliceforms John Sharp,1997 The Mathematics Teacher ,2006 *El-Hi Textbooks and Serials in Print* ,1985

Surfaces John Sharp,2021-05-21 The innovative use of sliceforms to explore the properties of surfaces is produced in a systematic way providing the tools to build surfaces from paper to explore their mathematics The extensive commentary explains the mathematics behind particular surfaces an exercise in practical geometry that will stimulate ideas for the student and the enthusiast as well as having practical applications in engineering and architecture Mathematical Models Henry Martyn Cundy,Arthur Percy Rollett,1972 **Mathematical Models** Henry Martyn Cundy,A. P. Rollett,1981 This is the classic book of detailed instructions for making a wide variety of mathematical models of all kinds Complete nets are given for all regular Archimedean and stellated polyhedra together with a number of interesting compounds There are sections on paper folding dissections curve stitching linkages the drawing of loci and envelopes and the construction of plane tessellations The volume is fully illustrated with diagrams and photographs of models in paper and other materials and all have been successfully made and tested Note for books that provide the nets and instructions to make various solids look at Make Shapes 1 Make Shapes 2 and Paper Polyhedra in Colour Cundy and Rollett provides both a wider range of nets but not in ready made form **Make Shapes** Gerald Jenkins,1990 *Mathematical Models* Arnold Emch,1920 **Mathematical Models** Gerd Fischer,2017-09-04 This book presents beautiful photos of mathematical models of geometric surfaces made from a variety of materials including plaster metal paper wood and string The construction of these models at the time of Felix Klein and others was not an end in itself but was accompanied by mathematical research especially in the field of algebraic geometry The models were used to illustrate the mathematical objects defined by abstract formulas either as equations or parameterizations In the second part of the book the models are explained by experts in the field of geometry This book is a reprint thirty years after the original publication in 1986 with a new preface by Gert Martin Greuel The models have a timeless appeal and a historical value *Mathematical Models* ,1993 Mathematical Models H.
