Small Change:

Small Change Larry Terkel, Susan Terkel, 2004-09-09 It's the little things in life that make a big difference. Replace a soft drink with water at just one meal say lunch. Over the course of a year you will drink approximately forty gallons more water, avoid consuming up to 50,000 calories and save as much as 500. Indeed, just as the stray coins you toss into a jar each evening gradually build into an amount you can use to actually purchase something substantial, small changes of any kind can really add up. In *Small Change*, husband and wife writing team Susan and Larry Terkel offer readers a gentle yet powerful program for making significant changes in their lives based on three simple principles. Small changes are easier than big makeovers. Each week add just one private dinner with your mate to your schedule and see your relationship improve by leaps and bounds. Small changes add up to big benefits over time. Smile just a little each day and over time watch your stress levels decrease, your immune system grow stronger and your relationships prosper. Small changes are more consistent with human nature and evolution. After all, in the end, the tortoise did beat the hare. With an emphasis on daily habits and some simple recipes for improving them, this wise little book outlines a fresh perspective on the timeless quest for sustainable self-improvement and a relatively painless pathway to a better you. *The Small Change Diet* Keri Gans, 2011-03-15 THE ONLY DIET PLAN YOU WILL EVER NEED. No deprivation, no struggles. Just ten small changes that will transform your life. Keri Gans, spokesperson for the American Dietetic Association, shares her simple plan for weight loss success that lasts a lifetime. The Small Change Diet isn't about creating unrealistic, unsustainable rules like counting calories, restricting choices, or eliminating entire food groups. It's about turning smart habits into second nature. When it comes to achieving healthy, continued weight loss, the smallest adjustments often make the biggest impact. The key is mastering one new habit before expecting yourself to tackle another. Keri breaks each of the plan's ten easy steps into even smaller, more manageable solutions. The best part is that you decide what to focus on and when you're ready to move on. Take your time. Once you've made all ten changes, you'll be healthier and thinner for good. **Small Change** Andrea H. Beller, John W. Graham, 1996-02-21 An analysis of child support payments during the 1980s which assesses what went right and what went wrong with them. The authors investigate the socioeconomic and legal factors that determined child support awards and receipts and offer policy recommendations for the future. Architecture and Space Re-imagined Richard Bower, 2016-06-10 As with so many facets of contemporary western life, architecture and space are often experienced and understood as a commodity or product. The premise of this book is to offer alternatives to the practices and values of such westernised space and Architecture with a capital A by exploring the participatory and grass roots practices used in alternative development models in the Global South. This process re-contextualises the spaces, values and relationships produced by such alternative methods of development and social agency. It asks whether such spatial practices provide concrete realisations of some key concepts of Western spatial theory, questioning whether we might challenge the space and architectures of capitalist

development by learning from the places and practices of others Exploring these themes offers a critical examination of alternative development practices methods in the Global South re contextualising them as architectural engagements with socio political space The comparison of such interdisciplinary contexts and discourses reveals the political social and economic resonances inherent between these previously unconnected spatial protagonists The interdependence of spatial issues of choice value and identity are revealed through a comparative study of the discourses of Henri Lefebvre John Turner Doreen Massey and Nabeel Hamdi These key protagonists offer a critical framework of discourses from which further connections to socio spatial discourses and concepts are made including post marxist theory orientalism post structural pluralism development anthropology post colonial theory hybridity difference and subalterneity By looking to the spaces and practices of alternative development in the Global South this book offers a critical reflection upon the working practices of Westernised architecture and other spatial and political practices In exploring the methodologies implications and values of such participatory development practices this book ultimately seeks to articulate the positive potential and political of learning from the difference multiplicity and otherness of development practice in order to re imagine architecture and space
