Spatial Policy Problems:

Spatial Policy Problems of the British Economy Michael Chisholm, Gerald Manners, 2009-06-18 Interest in the geography of economic and social change has grown in Britain over recent years as people have become more aware of regional imbalances and as government influence on the evolution of the country's spatial systems has increased. The processes of spatial allocation are becoming better understood as new techniques of analysis are developed. But weaknesses and inconsistencies in public policies remain and have attracted the attention of workers in various disciplines particularly geographers. This awareness is reflected in these essays most of which deal with economic rather than the social problems. They demonstrate the wide range of issues on which geographers can make a relevant contribution.

Policy Integration for Complex Environmental Problems Helen Briassoulis, 2017-07-05 This book proposes a comprehensive conceptualization of policy integration and negotiates pertinent theoretical, methodological and applied issues from the perspective of selected EU policies: rural development, regional development, transport, social, economic, environmental, water resources and biodiversity policy.

Actors and Agency in Global Social Governance Alexandra Kaasch, Kerstin Martens, 2015-10-22 *Actors and Agency in Global Social Governance* seeks to advance our understanding of the global dimension of social policy by applying the notion of global social governance on actors, their relations to each other and their pathways as well as their footprints of influence in the specific policy fields of social concern in which they are active. Focusing on a broad array of individual and corporate global social policy actors ranging from internationally operating intergovernmental organizations to state formations and NGOs, the contributions to this volume draw a fuller picture of agency in global social policy than what current accounts provide. It considers the multiple facets of individual scope and legitimacy for a particular actor in conjunction with the configuration of global social governance as characterised by multi-centred and multi-scaled obstacles as well as diverse forms of collaboration. The volume studies the contextualised actor's range and power in designing, shaping and facilitating various global social policies. Thus the contributions discuss the role of particular corporate actors within global social policy structures and assess the impact of a number of key organizations: states, groups and individuals in the governance of global social policy. At the same time a variety of social policy fields in which these actors are involved are addressed including labour market issues, family policy, health policy, education policy, migration issues and global re-distribution via various forms of development aid or remittances.

Evaluation of Complex Policy Problems Andreas Faludi, Henk Voogd, 1985 Geography Applied to Practical Problems James Henry Johnson, 1985 *Spatial Policy in a Divided Nation* Richard T. Harrison, Mark Hart, 2002-09 This re evaluation of the role of regional policy in the UK has been accompanied by a much closer identification of regional policy with national economic policymaking This book drawing upon the contributions of a large number of experts in the field in the UK sets the debate on the future of spatial policy explicitly within the context of the economics and politics of the North South divide Recent policy debates in the United Kingdom have highlighted two major issues which will shape future policy developments and their impact in the 1990s the persistence of pronounced regional economic and social imbalances and the shift away from traditional perceptions of the role of regional policy with a new emphasis on inner city as opposed to regional problems In this collection by leading researchers in the field the role of regional policy in the UK is re evaluated against a background of renewed debate on the economic disparities inherent in the north south divide and an assessment of the implications for future policy

Urban Issues and Urban Policies in the New EU Countries Ronald van Kempen, Marcel Vermeulen, Ad Baan, 2005 This volume brings together case studies from Hungary the Czech Republic Poland Slovakia Slovenia Estonia Latvia Lithuania Cyprus and Malta to provide a comprehensive overview of these countries urban policies It provides new insights not only for the new EU countries but also for the existing ones

Wrecking a Region Ray Hudson, 1989 The impetus for this book came from the author's perception of and subsequent research into the dramatic changes taking place in his home region N E England for which he saw parallels in many industrialized countries He saw new factories opening as collieries closed railways being shut down as new roads were being built town centres being

Modeling and Simulation ,1985 *The Changing American Countryside* Emery N. Castle,1995 The literature on rural America to the extent that it exists has largely been written by urban based scholars perpetuating out of date notions and stereotypes or by those who see little difference between rural and agricultural concerns As a result the real rural America remains much misunderstood neglected or ignored by scholars and policymakers alike In response Emery Castle offers *The Changing American Countryside* a volume that will forever change how we look at this important subject Castle brings together the writings of eminent scholars from several disciplines and varying backgrounds to take a fresh and comprehensive look at the forgotten hinterlands These authors examine the role of non metropolitan people and places in the economic life of our nation and cover such diverse issues as poverty industry the environment education family social problems ethnicity race religion gender government public policy and regional diversity The authors are especially effective in demonstrating why rural America is so much more than just agriculture It is in fact highly diverse complex and interdependent with urban America and the international market place Most major rural problems they contend simply cannot be effectively addressed in isolation from their urban and international connections To do so is misguided and even hazardous when one fourth of our population and ninety seven per cent of our land area is rural Together these writings not only provide a new and more realistic view of rural life and public policy but also suggest how the field of rural studies can greatly enrich our understanding of national life
