## Standing Ground:

**The Herons of Europe** Claire Voisin, 2010-10-30 Although the majority of the world's Herons live in the tropics and subtropics Europe is home to nine species some large some small some colonial some solitary breeders Highly specialized birds they exhibit many interesting differences in their behaviour and ecology and are a favourite group for many ornithologists Voisin begins her book with a general description of the family before going on to treat each species in more detail The species accounts summarize such topics as field characters distribution population size breeding and feeding ecology and behaviour Numerous figures and tables are accompanied by fine drawings of behaviour by P L Suiro and colour and black and white pictures of each species by Gunnar Brusewitz

The Poetics of Philosophy [A Reading of Plato] David Ross, 2008-12-18 The Poetics of Philosophy is my attempt to hear what academic philosophy attempts to silence namely how reason resonates with madness It is thus a stinging of the great steed of academia in order to recover and re-experience what otherwise would be repressed by the exigencies of bureaucratic commodity life in the late capitalist world An analysis of Plato's principal dialogues with a view towards developing the author's conception of thinking knowing and loving it incorporates the insights of Heidegger Nietzsche and Derrida Provoking the world mind to reflect upon its phenomenological possibility for Being dispersed within its daily routines or business the book argues for the metaphysicality of physical reality articulated through the narrative trope of fractal dialectical logic The present volume's more general implications extend the insights of the author's previous work in the area of social science I refer to the possibility for world communist revolution which is predicated on communism's thorough ridding itself of its naive materialist perspective the relics of a Newtonian Universe and its embracing of a fractal dialectical logic or similar that is better able to incorporate the yearning for immortality desire to experience beauty and the need to have a meaningful life that define human species life To articulate such a framework is the aim of my general research

Being in Time to the Music David Ross, 2008-12-18 Being in time to the music from the ground up is a work in phenomenology where this term is broadly defined comprehending Plato Heidegger Hegel and Marx The most direct referent is Hegel together with the theoretical revolution that he initiated with Phenomenology of Mind This text's more general purpose is to set the tone for a 21st communism based upon the idea of dancing with death assuming full responsibility for one's mortality and abandoning the self to love as the meaning of existence This dance is choreographed through my conversations with the above mentioned writers In conversing with them I aim to displace if not usurp them from the throne of honour which is nothing more than the authority borrowed from me By this I do not intend to deny completely their other to me character However they exist or even figure for me both in the sense of of count having importance as those that I read and by which I read myself They have borrowed my authority namely my own potential to be an author So reading them is to re-assume that borrowed authority The life of the reader to paraphrase Barthes begins with the death of the author
