Koren,2023-07-24 In the first place I want to point out that the term science is not restricted here to the physical sciences as is usually done in English and French scientific literature but is used in a very broad sense namely for science in general as well as each and any special science no matter what its nature be including theology and philosophy If in particular chapters restrictions are made in the use of the term this will always be justified and wherever possible indicated by the addition of a qualifying noun Although the term science is used in a very broad sense a large number of the examples illustrating the text will be borrowed from the physical sciences The reason is first of all that because of his former studies the author is most familiar with this domain but also that the physical sciences often reveal most clearly the typical features of science **Dialogic Collaborative Action Research in Science Education** Allan Feldman, Jawaher Alsultan, Katie Laux, Molly Nation,2023-08-17 This engaging and practical book offers science teacher educators and K 12 science teachers alike the tools to engage in a dialogic mode of collaborative action research D CAR a collaborative mode of action research focused on teachers experiences with students reflection upon these experiences and peer learning Renowned science educator Allan Feldman and co authors from across numerous settings in K 12 science education present the theory methodology case studies and practical advice to support the use of D CAR as a means to enhance teachers normal practice and address the problems dilemmas and dissonances that science teachers must negotiate as they work to meet the needs of an increasingly diverse student population and engage with complex science teaching challenges that disproportionately affect marginalized students The book will be of use to science teacher educators pre service and in service science teachers professional development specialists or any science
