The Thinking Machine:

The Thinking Machine Stephen Witt, 2025-04-08 Stephen Witt's deep reporting shines through every page of *The Thinking Machine*. The result is a page-turning biography of perhaps the most consequential CEO and company in the world: David Epstein, New York Times bestselling author of *Range*. Nvidia is as valuable as Apple and Microsoft. It has shaped the world as we know it. But its story is little known. This is the definitive story of the greatest technology company of our times. In June of 2024, thirty-one years after its founding in a Denny's restaurant, Nvidia became the most valuable corporation on Earth. *The Thinking Machine* is the astonishing story of how a designer of video game equipment conquered the market for AI hardware and in the process re-invented the computer. Essential to Nvidia's meteoric success is its visionary CEO, Jensen Huang, who more than a decade ago, on the basis of a few promising scientific results, bet his entire company on AI. Through unprecedented access to Huang, his friends, his investors, and his employees, Witt documents for the first time the company's epic rise and its single-minded and ferocious leader, now one of Silicon Valley's most influential figures. *The Thinking Machine* is the story of how Nvidia evolved to supplying hundred-million-dollar supercomputers. It is the story of a determined entrepreneur who defied Wall Street to push his radical vision for computing, becoming one of the wealthiest men alive. It is the story of a revolution in computer architecture and the small group of renegade engineers who made it happen. And it is the story of our awesome and terrifying AI future, which Huang has billed as the next industrial revolution: a new kind of microchip unlocks hyper-realistic avatars, autonomous robots, self-driving cars, and new movies, art, and books generated on command. This is the story of the company that is inventing the future.

The Thinking Machine Stephen Witt, 2025-04-08 A lively biography. The story of how Nvidia became the hottest investment on Wall Street and a household name is fascinating. Katie Notopoulos, The New York Times Book Review. Framed as a biography of Jensen Huang, the only CEO Nvidia has ever had, the book is also something more interesting and revealing: a window onto the intellectual, cultural, and economic ecosystem that has led to the emergence of superpowerful AI. James Surowiecki, The Atlantic. Stephen Witt's deep reporting shines through every page of *The Thinking Machine*. The Thinking Machine Charles Judson Herrick,1929 This is a book about the natural history of human nature It is not a book about philosophy for philosophers It is a plain and straightforward statement for ordinary people of what another very ordinary sort of man who has considerable experience with the mechanisms of human life and how they work thinks about it all We all want to understand human nature better because it is our nature The better we understand it the more likely we are to get along with ourselves our neighbors and our surroundings in general We want to make life more worthwhile to get as much out of it as we can and to put as much into it as we can to make a better living and to have as much fun doing it as possible We need to know how we live what the apparatus of life is and how it works in order to make a better job of it Preface
