**Screening The Novel** Keith Selby, Robert Giddings, 2016-07-27 The book takes as its theme the relationship between literature and the contemporary means of production and distribution collectively termed the media in particular film and television The intention of the book is to explore and evaluate the mutual opportunities and restrictions in this relationship In the grammar of our culture there seems to be an accepted opinion that print is superior in terms of cultural production to film radio or television that to read a book is somehow a higher cultural activity than seeing a play on television or seeing a film By the same token a novel is a superior work of art to film or television The longer perspective reveals that traditionally there always is a greater respect paid to the previous mode of literary production poetry was superior to drama poetic drama was superior to the novel and film attained cult and classic status initially over television

**Social Practices as Biological Niche Construction** Joseph Rouse, 2023-08-16 A broad synthetic philosophy of nature focused on human sociality In this book Joseph Rouse takes his innovative work to the next level by articulating an integrated philosophy of society as part of nature He shows how and why we ought to unite our biological conception of human beings as animals with our sociocultural and psychological conceptions of human beings as persons and acculturated agents Rouse s philosophy engages with biological understandings of human bodies and their environments as well as the diverse practices and institutions through which people live and engage with one another Familiar conceptual separations of natural social and mental worlds did not arise by happenstance he argues but often for principled reasons that have left those divisions deeply entrenched in contemporary intellectual life Those reasons are eroding in light of new developments across the disciplines but that erosion has not been

sufficient to produce more adequately integrated conceptual alternatives until now Social Practices and Biological Niche Construction shows how the characteristic plasticity plurality and critical contestation of human ways of life can best be understood as evolved and evolving relations among human organisms and their distinctive biological environments It also highlights the constitutive interdependence of those ways of life with many other organisms from microbial populations to certain plants and animals and explores the consequences of this in depth noting for instance how the integration of the natural and social also provides new insights on central issues in social theory such as the body language normativity and power
