The impact and effect of project and change management approaches in delivering business change Alex Ngumbi,2013-12-04 Seminar paper from the year 2012 in the subject Business economics Business Management Corporate Governance grade B University of Cambridge language English abstract Change management is defined as a structured approach for transforming organizations teams and individuals from their current position to a future state which is desired for fulfilling or implementing a strategy or vision In simple terms it is a form of organizational process which aims at empowerment of employees for accepting as well as embracing changes taking place in their immediate environment This paper will specifically emphasize on issues related with leadership and management required for delivering business changes within the organization and in its workforce Managing changes is associated with project management and is a distinct process altogether A discussion based on the significance and ruling of the change agent has also been done This is because the role played by the change agent is significant to trigger organizational changes and make them acceptable to the workforce The chief difficulty faced by the agent is managing individual resistances against change It is human nature to be resistant to change due to habit The conflict lies in

the interests of the manager and the client regarding a project which help in forming the challenge of leadership and empowerment and also serves as the point of debate for the change process Since managing change in itself is a distinct process it is important to discuss the competencies and strategies that need to be implemented Anderson 2010
