

# Sudden Light

I have been here before,  
But when or how I cannot tell:  
I know the grass beyond the door,  
The sweet keen smell,

The sighing sound, the lights around the shore.

You have been mine before,—  
How long ago I may not know:  
But just when at that swallow's soar  
Your neck turned so,

Some veil did fall,—I knew it all of yore.

Then, now,—perchance again! . . .  
O round mine eyes your tresses shake!  
Shall we not lie as we have lain  
Thus for Love's sake,

And sleep, and wake, yet never break the chain?

About the Stars Rishikesh Jaiswal,2025-03-25 For as long as humans have looked up at the night sky stars have been our silent companions guiding travellers inspiring myths and fueling our endless curiosity about the cosmos About the Stars takes you on an illuminating journey through these celestial wonders from their fiery birth in vast stellar nurseries to their dramatic transformations into black holes neutron stars or quiet white dwarfs Along the way we explore the mysteries of our Sun the breathtaking beauty of nebulae and the forces that shape the universe itself Unlike books that merely skim the surface this book delves deeper offering a clear and engaging understanding of stars in a way that is both insightful and accessible Complex concepts are unraveled into simple digestible explanations making even the most intricate stellar phenomena easy to grasp While mathematics plays a role in astrophysics this book prioritizes understanding over equations ensuring that readers of all backgrounds can appreciate the grandeur of the cosmos without barriers Whether you re a seasoned stargazer an aspiring astronomer or simply someone who marvels at the night sky About the Stars invites you to explore the universe in a new light Through these pages you ll see the cosmos not just as a collection of distant points of light but as a vast and interconnected story one written in starlight *Bulletin* Southern California Academy of Sciences,1904

**A History of Astronomy** David Leverington,2012-12-06 The history of astronomy is like most history a multidimensional story and when writing about a specific period the author has to decide how to handle all the developments of earlier times in order to set the scene I have done this by starting most chapters of the book with a summary of astronomical knowledge at the beginning of our chosen period together with a brief review of how such knowledge had been gained This story is not only interesting in itself but it will also assist those readers that would appreciate a brief reminder of some of the basic elements of astronomy It is also necessary to decide when to start our history Should it be the year 1900 or 1890 or should it be linked to some key development or investigation e g the discovery of the electron by J J Thomson in 1897 or the discovery of spectroscopic binary stars by Pickering and Vogel independently in 1889 or maybe the year 1890 in which Thomas Edison tried unsuccessfully to detect radio waves from the Sun and Johannes Rydberg published his formula for atomic spectra I have in fact decided to start this history at about 1890 as it was the year of publication of the Draper Memorial Catalogue of stellar spectra which together with its updates provided essential data for the understanding of stellar spectra until well into the twentieth century This date also gives a clear hundred years up to the present **Popular Astronomy** ,1905 *Space*
