Finance Inquiry Commission,1924 **Climate Change and Human Health Scenarios** Rais Akhtar,2024-01-01 The
objective of the present edited book is to encompass studies from both developed and developing countries of Asia Africa
Europe and Americas to understand and present a comparative scenario of the climate change and other environmental
determinants of health and disease in geographically diversified countries Environment and health perspective dates back to
Hippocrates treatise written 400 B C E In his book *On Airs Waters and Places* Hippocrates described diseases as associated
with environmental conditions Whoever wishes to investigate medicine properly should proceed thus in the first place to
consider the seasons of the year and what effects each of them produces for they are not at all alike but differ much from
themselves in regard to their changes Then the winds the hot and the cold especially such as are common to all countries and
then such as are peculiar to each locality We must also consider the qualities of the waters for as they differ from one another
in taste and weight so also do they differ much in their qualities In the same manner when one comes into a city to which he
is a stranger he ought to consider its situation how it lies as to the winds and the rising of the sun for its influence is not the
same whether it lies to the north or the south to the rising or to the setting sun There has been a greater emphasis in the last
four decades on understanding environmental factors which affect human health after United Nations established
Intergovernmental Panel on Climate Change IPCC in 1988 aimed at to evaluate research on changing environmental
condition particularly climate change and its impacts on human wellbeing including human health as consequences of
extreme heat waves conditions sea level rise forced migration air pollution droughts and wildfires From these studies risk
levels of vulnerable populations and regions can be assessed and level of resilience of healthcare infrastructure that may be

used in environmental health policy and equity of these countries *Australian National Bibliography: 1992* National Library of Australia, 1988 *Handbook of Aviation Neuropsychology* Robert Bor, Carina Eriksen, Randy J.
