

## User Interface

Using ForkLift will come very easily. If you are used to Finder, everything will look familiar, and all the extra functionality will work as you expect it. ForkLift's user interface has got highly modular by now. You can have it anyways, from a minimal single pane look to the pedal-to-the-metal 3 ton engineering monster it can become, depending on what you need at the moment.

### Main Panes

The main panes display the item lists for your current location. You can always see your current location in the path bar sitting on top of each main pane. When both panes are visible, the active pane is shown by a blue highlighted path bar. The color of the path bar and the selection can be changed at System Preferences > General > Highlight color.

### Path Bar

The path bar is displayed at the top of each main pane and shows the path of your current location. You can click the items in the bar to quickly navigate up in your filesystem. The path bar also supports drag and drop.

# Software Manual

**Huangqi Zhang**

## Software Manual:

*The User Manual Manual* Michael Bremer, 1999 *The User Manual Manual* is a master s course on creating software manuals Written for writers managers and producers it describes the grammar style techniques and tricks needed to write a manual that gets read It explains how to understand and target readers technically inclined or not even if they re kids Plus it covers special topics including dealing with rush projects preparing for internationalization and handling projects with multiple writers multiple platforms and multiple bosses *The User Manual Manual* is a guided tour through the entire process of creating a user manual from initial concept through writing testing editing and production to postmortem It contains sample documents worksheets and checklists to help writers work smarter and faster
