The Ethical Function Of Architecture:

The Ethical Function of Architecture Karsten Harries,1998-07-31 Can architecture help us find our place and way in today s complex world Can it return individuals to a whole to a world to a community Developing Giedion s claim that contemporary architecture s main task is to interpret a way of life valid for our time philosopher Karsten Harries answers that architecture should serve a common ethos But if architecture is to meet that task it first has to free itself from the dominant formalist approach and get beyond the notion that its purpose is to produce endless variations of the decorated shed In a series of cogent and balanced arguments Harries questions the premises on which architects and theorists have long relied premises which have contributed to architecture s current identity crisis and marginalization He first criticizes the aesthetic approach focusing on the problems of decoration and ornament He then turns to the language of architecture If the main task of architecture is indeed interpretation in just what sense can it be said to speak and what should it be speaking about Expanding upon suggestions made by Martin Heidegger Harries also considers the relationship of building to the idea and meaning of dwelling Architecture Harries observes has a responsibility to community but its ethical function is inevitably also political He concludes by examining these seemingly paradoxical functions *The Ethical Function of*
