AI Productivity Tools Checklist:

Survival Guide in the AI Era Kewei Li, 2026-03-01 AI Survival Guide is a work that deeply analyzes how artificial intelligence reshapes the workplace. It points out that generative AI is rapidly replacing large numbers of low threshold and highly repetitive jobs from customer service and translation to coding, video editing, administrative tasks, and accounting. These roles share traits of standardization and repetition which once relied on experience or patience but now appear fragile against algorithms. AI not only provides faster and more accurate answers but also simulates empathy, generates content, and automates complex processes. The author reminds readers that survival lies not in clinging to old skills but in becoming commanders of machines, mastering cross domain integration, decision making, and creativity, and showing human insight where AI cannot reach. This book is both a warning and a guide helping readers find new footholds in times of upheaval.

AI TOOLS FOR EVERYDAY LIFE Jeet Arya, 2026-02-17 Artificial intelligence is no longer a technology of the future. It is a practical tool available right now, and most of the best tools are either free or cost less than a streaming subscription. The problem is not access; it is knowing what actually works, how to use it, and when to trust it. *AI Tools for Everyday Life* is the guide that answers those questions honestly. No hype. No jargon. No assumption that you have an engineering degree. Just clear, tested, practical guidance for using AI in the four areas of life where it delivers the most immediate value.

WHAT IS COVERED

Learning: Turn any document or course material into an interactive personal tutor using NotebookLM, Khanmigo, and AI study techniques grounded in cognitive science.

Creative Work: Use Midjourney, DALL·E 3, ElevenLabs, and Descript to produce professional-quality images, audio, and video without a design background or large budget.

Automation: Connect AI tools with Zapier and Make to eliminate your most repetitive tasks with zero coding required.
