Structures Or Why Things Dont Fall Down:

Structures J. E. Gordon, 2009-04-28 In a book that Business Insider noted as one of the 14 Books that inspired Elon Musk J E Gordon strips engineering of its confusing technical terms communicating its founding principles in accessible witty prose For anyone who has ever wondered why suspension bridges don t collapse under eight lanes of traffic how dams hold back or give way under thousands of gallons of water or what principles guide the design of a skyscraper or a kangaroo this book will ease your anxiety and answer your questions J E Gordon strips engineering of its confusing technical terms communicating its founding principles in accessible witty prose

Structures or Why things don't fall down J. Gordon, 2012-12-06 I am very much aware that it is an act of extreme rashness to attempt to write an elementary book about structures Indeed it is only when the subject is stripped of its mathematics that one begins to realize how difficult it is to pin down and describe those structural concepts which are often called elementary by which I suppose we mean basic or fundamental Some of the omissions and oversimplifications are intentional but no doubt some of them are due to my own brute ignorance and lack of understanding of the subject Although this volume is more or less a sequel to The New Science of Strong Materials it can be read as an entirely separate book in its own right For this reason a certain amount of repetition has been unavoidable in the earlier chapters I have to thank a great many people for factual information suggestions and for stimulating and sometimes heated discussions Among the living my colleagues at Reading University have been generous with help notably Professor W D Biggs Professor of Building Technology Dr Richard Chaplin Dr Giorgio Jeronimidis Dr Julian Vincent and Dr Henry Blyth Professor Anthony Flew Professor of Philosophy made useful suggestions about the last chapter I am also grateful to Mr John Bartlett Consultant Neurosurgeon at the Brook Hospital Professor T P Hughes of the University of the West Indies has been helpful about rockets and many other things besides My secretary Mrs Jean Collins was a great help in times of trouble Mrs Nethercot of Vogue was kind to me about dressmaking Mr Gerald Leach and also many of the editorial staff of Penguins have exercised their accustomed patience and helpfulness Among the dead I owe a great deal to Dr Mark Pryor lately of Trinity College Cambridge especially for discussions about biomechanics which extended over a period of nearly thirty years Lastly for reasons which must surely be obvious I owe a humble oblation to Herodotus once a citizen of Halicarnassus
