management tasks such as distributing software patches and security policies extremely challenging The IBM Tivoli Endpoint Manager platform is architected for today s highly diverse distributed and complex IT environments It provides real time visibility and control through a single infrastructure single agent and single console for systems lifecycle management endpoint protection and security configuration and vulnerability management This platform enables organizations to securely manage their global IT infrastructures faster and more accurately resulting in improved governance control visibility and business agility Plus it gives organizations the ability to handle tomorrow s unforeseen challenges In this IBM Redbooks publication we provide IT security professionals with a better understanding around the challenging topic of endpoint management in the IT security domain We focus on IBM Tivoli Endpoint Manager for Security and Compliance and describe the product architecture and provide a hands on design guide for deploying the solution This book is a valuable resource for security professionals and architects who want to understand and implement a centralized endpoint management infrastructure and endpoint protection to better handle security and compliance challenges

[IBM z/OS Mainframe Security and Audit Management Using the IBM Security zSecure Suite](#) Axel Buecker,Michael Cairns,Monique Conway,Mark S. Hahn,Deborah McLemore,Jamie Pease,Lili Xie,IBM Redbooks,2011-08-18 Every organization has a core set of mission critical data that must be protected Security lapses and failures are not simply disruptions they can be catastrophic events and the consequences can be felt across the entire organization As a result security administrators face serious challenges in protecting the company s sensitive data IT staff are challenged to provide detailed audit and controls documentation at a time when they are already facing increasing demands on their time due to events such as mergers reorganizations and other changes Many organizations do not have enough experienced mainframe security administrators to meet these objectives and expanding employee skillsets with low level mainframe security technologies can be time consuming The IBM Security zSecure suite consists of multiple components designed to help you administer your mainframe security server monitor for threats audit usage and configurations and enforce policy compliance Administration provisioning and management components can significantly reduce administration contributing to improved productivity faster response time and reduced training time needed for new administrators This IBM Redbooks publication is a valuable resource for security officers administrators and architects who wish to better understand their mainframe security solutions

**Identity Management Design Guide with IBM Tivoli Identity Manager** Axel Buecker,Dr. Werner Filip,Jaime Cordoba Palacios,Andy Parker,IBM Redbooks,2009-11-06 Identity management is the concept of providing a unifying interface to manage all aspects related to individuals and their interactions with the business It is the process that enables business initiatives by efficiently managing the user life cycle including identity resource provisioning for people users and by integrating it into the required business processes Identity management encompasses all the data and processes related to the representation of an individual involved in electronic transactions This IBM Redbooks publication provides an approach for designing an identity

management solution with IBM Tivoli Identity Manager Version 5.1 Starting from the high level organizational viewpoint we show how to define user registration and maintenance processes using the self registration and self care interfaces as well as the delegated administration capabilities Using the integrated workflow we automate the submission approval processes for identity management requests and with the automated user provisioning we take workflow output and automatically implement the administrative requests on the environment with no administrative intervention This book is a valuable resource for security administrators and architects who wish to understand and implement a centralized identity management and security infrastructure

Integrating IBM Security and SAP Solutions Axel Buecker,Ivy Chiu,Kenny Chow,Ingo Dressler,Anthony Ferguson,Vaughan Harper,David Moore,Zoran Radenkovic,Guy Redding,John Robinson,Sascha Schefenacker,Franz Wolfhagen,IBM Redbooks,2012-03-19 Many large and medium sized organizations have made strategic investments in the SAP NetWeaver technology platform as their primary application platform In fact SAP software is used to manage many core business processes and data As a result it is critical for all organizations to manage the life cycle of user access to the SAP applications while adhering to security and risk compliance requirements In this IBM Redbooks publication we discuss the integration points into SAP solutions that are supported by the IBM Security access and identity management product capabilities IBM Security software offers a range of identity management IdM adapters and access management components for SAP solutions that are available with IBM Tivoli Identity Manager IBM Tivoli Directory Integrator IBM Tivoli Directory Server IBM Access Manager for e business IBM Tivoli Access Manager for Enterprise Single Sign On and IBM Tivoli Federated Identity Manager This book is a valuable resource for security officers consultants administrators and architects who want to understand and implement an identity management solution for an SAP environment

*IBM Security Solutions Architecture for Network, Server and Endpoint* Axel Buecker,Kent Browne,Louis Foss,Jaco Jacobs,Vladimir Jeremic,Carsten Lorenz,Craig Stabler,Joris Van Herzele,IBM Redbooks,2011-02-17 Threats come from a variety of sources Insider threats as well as malicious hackers are not only difficult to detect and prevent but many times the authors of these threats are using resources without anybody being aware that those threats are there Threats would not be harmful if there were no vulnerabilities that could be exploited With IT environments becoming more complex every day the challenges to keep an eye on all potential weaknesses are skyrocketing Smart methods to detect threats and vulnerabilities as well as highly efficient approaches to analysis mitigation and remediation become necessary to counter a growing number of attacks against networks servers and endpoints in every organization In this IBM Redbooks publication we examine the aspects of the holistic Threat and Vulnerability Management component in the Network Server and Endpoint domain of the IBM Security Framework We explain the comprehensive solution approach identify business drivers and issues and derive corresponding functional and technical requirements which enables us to choose and create matching security solutions We discuss IBM Security Solutions for Network Server and Endpoint to effectively counter threats and attacks using a range of

protection technologies and service offerings Using two customer scenarios we apply the solution design approach and show how to address the customer requirements by identifying the corresponding IBM service and software products
