## To Start A New Civilization:

How Can We Begin to Create a New Civilization? Luis Razeto Migliaro, 2017-09-14 Throughout history and in different parts of the world many civilizations with different features have been created Civilizations have been of various sizes some very large others small Real people have created them men and women like us through activities and theoretical and practical processes that we can identify through the study of history If we look beyond the differences between them we can learn quite clearly what a civilization is its foundations and its pillars its main structures and the elements that shape it And we can also discover when a civilization declines and tends to disappear how and when the need to create a new civilization arises and what are the initiatives and activities deployed by what kind of people and groups that begin its creation All this knowledge about past civilizations applied to the present reality allows us to say that we are living today a historical phase in which our civilization is in organic crisis and has started to decay while the initiatives and activities tending to create a superior civilization begin to unfold to replace it The historical knowledge of past civilizations and of the present modern civilization from its inception development consolidation and crisis can greatly facilitate the theoretical and practical action of those who today intend to lay the foundations and begin the creation of a new and superior civilization that will open human experience to new and broader horizons In this small volume I propose to synthesize all these ideas and to express them in an accessible language to anyone who may be interested *A Divine Invitation to Create a New World* Reynaldo Pareja, 2012-01-26 Television radio newspapers or the internet show a daily dismal world scenario Every week every month there is a major civil conflict or a terrorist attack somewhere All over the world innocent are imprisoned women are victims of domestic violence are forced into underpaid labor or sex work Children are still dying by the millions before they are five years old due to unsanitary conditions lack of safe drinking water or malnourishment Malaria and HIV AIDS kill millions yearly and thousands of adolescents are kidnapped to become rebel soldiers Autocratic governments deny democratic participation to the majority and suppress ferociously any popular peaceful manifestation The worlds climate is now threatened due to man made disequilibrium inflicted on the atmosphere by uncontrolled fumes and gas emissions of all types Water sources are being poisoned by unscrupulous corporations dumping huge amounts of deadly chemicals into waterways The inequality between rich and poor nations is so vast that 7 10% of the worlds population controls the natural and financial resources of the world at the expense of the rest who have no access to a minimum for survival The reasons for this hellish situation are multiple and varied They encompass deeply ingrained religious beliefs unacceptable economic military and power disparities and uncontrolled moral degradation affecting all realms of everyday life These problems have profound spiritual causes and thus require a spiritual perspective Discover the origin of the new Divine Invitation and the specific solutions it offers for todays major world problems **CHRISTIANITY & THE WORLD** Dr.LI, JIN WEI, 2022-10-08 This series of complete works is an introduction and a detailed discussion of the influence of Christianity on all levels of the world

and the inextricable relationship between the environment and religion especially the world's largest Christianity with 2.2 billion believers worldwide. A person who does not understand religion especially Christianity cannot properly understand our world, cannot adapt to many things, and even makes wrong decisions in many aspects. This series of collections are aimed at people from all walks of life regardless of their beliefs or non-beliefs to understand and study the role of Christianity and other major religions in international relations within and outside countries and predict their impact and prospects in various social fields. Corrections, Peacemaking and Restorative Justice Michael Braswell, John Fuller, Bo Lozoff, 2001-01-01. This book views peacemaking as a broad encompassing process that is expressed in many different shapes and forms. It blends ancient wisdom, traditions, peacemaking, criminology, and restorative justice principles as a way of intervening with offenders in both institutional and community-based settings. Philosophical and spiritual contexts for peacemaking are presented that form a foundation for understanding the potential for peacemaking in criminological thought, the criminal justice system, and society in general.

**Rebuilding Community Solidarity and Pluralism** Donald G. Reid, 2024-06-03. This book critiques the traditional practice of community organization, change, and development and concludes that the present practice of Community Development (CD) and Social Policy and Planning (SP/P) is no longer capable of meeting the current challenges at the local or national level. The aim of this book is to identify the underlying motivations for the individual, aggressive, and collective antisocial behaviour that we witness in democratic society today and offer changes to the orientation of the current community change practice in order to build a system that can better address the present needs of society. This work identifies the factors that are moving society toward extremism and authoritarianism, focusing particularly on the community level. Given the turmoil in communities that is degrading democracy and leading to authoritarianism today, the issues of Community Solidarity and Pluralism (CS/P) must be attended to before the traditional political, economic, and material issues that are regularly addressed by CD and SP/P practice can become the focus for change and development once again. This book will have widespread appeal to academics, researchers, and postgraduate students throughout the social sciences, including sociology, social work, political science, economics, philosophy, environmental studies, and international and community development studies. It is also intended for the general reader who is interested in
