

Many times there is no perfect solution for a given problem. No solution is also a solution. Everything depends upon how you look at it. We make judgements on others depending on what we think of them.

Carlos Is Not Crazy!: The Perfect Solution to Preventing the Mass Shootings in our Schools! American Oracle, 2022-06-23
The mass shooting in Texas on Tuesday May 24 2022 that killed 19 children galvanized me into writing this children's book. It is my solution to the killing children in their schools problem. I am convinced it is the only solution that will work. It is written for and to the children who were not killed in these egregious mass shootings who will live to adulthood so they can do what their parents and grandparents would not or could not do, which is to get the guns and stop the killing. Since the mass shooting in Texas involved 4th graders, I used a 4th grader named Carlos to get my message across, and since children are our future and will lead the way to solving this unfortunate problem of ours by changing America when they grow up, I used the children's book as the medium for my message. There will come a Tipping Point when the majority of Americans will want to get the guns and it will arrive when the friends of the children being killed today become Voters and Congressmen and Supreme Court Judges and President.

Excellence doesn't just happen. It needs to be designed, and even the best designs can be improved upon. That's something that Angelo Baratta, who spent more than thirty years leading more than a hundred projects for more than fifty organizations, discovered the hard way. While most of these projects succeeded, success rates were never as high as they should have been. This, he determined, was the direct result of the design of the business processes. By mastering process design, organizations can achieve much higher success rates, and all stakeholders can benefit. With this guidebook, you'll learn how to improve performance by employing the Relational Process Model, a systematic approach to designing business processes. You'll learn the power of linking execution to strategy, various strategies to make value visible, how to measure and promote excellence, ways to promote meaningful change, many other methods to improve business operations. It is essential to improve the design of business processes because organizations don't just deliver services; they are also where people spend a good portion of their lives. Connect strategy, processes, projects, and performance, and equip yourself with the tools you need to improve your organization.

Doing AI Richard Heimann, 2021-12-14
Artificial intelligence (AI) has captured our imaginations and become a distraction. Too many leaders embrace the oversized narratives of artificial minds outpacing human intelligence and lose sight of the original problems they were meant to solve. When businesses try to do AI, they place an abstract solution before problems and customers without fully considering whether it is wise, whether the hype is true, or how AI will impact their organization in the long term. Often absent is sound reasoning for why they should go down this path in the first place. *Doing AI* explores AI for what it actually is and what it is not, and the problems it can truly solve. In these pages, author Richard Heimann unravels the tricky relationship

between problems and high tech solutions exploring the pitfalls in solution centric thinking and explaining how businesses should rethink AI in a way that aligns with their cultures goals and values As the Chief AI Officer at Cybraics Inc Richard Heimann knows from experience that AI specific strategies are often bad for business Doing AI is his comprehensive guide that will help readers understand AI avoid common pitfalls and identify beneficial applications for their companies This book is a must read for anyone looking for clarity and practical guidance for identifying problems and effectively solving them rather than getting sidetracked by a shiny new solution that doesn't solve anything
