Women in Leadership Positions in the People's Republic of China Maria Adnane,2020-06-02 Master s Thesis from the year 2012 in the subject Business economics Business Management Corporate Governance grade 1 7 Heilbronn University language English abstract Women are still significantly underrepresented in Top Management positions and leadership is still associated with the male gender as leadership theories traditionally focus on men This is especially evident in China which has one of the world s highest female labor participation but a female share of only eight percent on the corporate boards Although Chinese women s tertiary educational attainment is now equal to the tertiary education of Chinese men they still face many barriers on their way to the top The strong influence of Confucian values perceiving women as inferior to men remains noticeable until today and women find themselves exposed to a strongly patriarchal business environment As being traditionally the main care givers of their families they are deemed to be expensive potential mothers and thus gender preference can be observed second Classical leadership theories of the Western culture as well as of the Chinese culture are introduced to provide a common understanding of their approaches Further the situation of women in the past and of today is being compared as well as their leadership styles access to managerial leadership positions and the barriers they face Since educational attainment of both genders does not explain why women are rarely found on the upper managerial ranks other reasons that could be a barrier for women s career advancement are examined in this research

The Dark Side of Transformational Leadership Dennis

Tourish,2013-03-12 Most research into leadership has presented leaders as heroic charismatic and transformational visionaries The leader whether in business politics or any other field is the most important factor in determining whether organizations succeed or fail Indeed despite the fundamental mistakes which have arguably directly led to global economic recession it is often still taken for granted that transformational leadership is a good thing and that leaders should have much more power than followers to decide what needs to be done The Dark Side of Transformational Leadership confronts this orthodoxy by illustrating how such approaches can encourage narcissism megalomania and poor decision making on the part of leaders at great expense to those organizations they are there to serve Written in a lively and engaging style the book uses a number of case studies to illustrate the perils of transformational leadership from the Jonestown tragedy in 1978 when over 900 people were either murdered or committed suicide at the urging of their leader to an analysis of how banking executives tried to explain away their role in the 2008 financial crisis This provocative and hugely important book offers a rare critical perspective in the field of leadership studies Concluding with a new approach that offers an alternative to the dominant transformational model The Dark Side of Transformational Leadership will be an invaluable text for academics interested in leadership students on leadership courses requiring a more critical perspective and anyone concerned with how people lead people and the lessons we can learn
