The Autonomy of Science Maurice N. Richter, 1980 **Proceedings of the 2024 9th International Conference on Modern Management, Education and Social Sciences (MMET 2024)** Chunyi Lin, Fong Peng Chew, Intakhab Alam Khan, Catalin Popescu, 2024-12-07 This is an open access book As a leading role in the global megatrend of scientific innovation China has been creating a more and more open environment for scientific innovation increasing the depth and breadth of academic cooperation and building a community of innovation that benefits all Such endeavors are making new contributions to the globalization and creating a community of shared future To adapt to this changing world and China's fast development in the new era 2024 9th International Conference on Modern Management Education and Social Sciences MMET 2024 to be held in September 20 22 2024 This conference takes bringing together global wisdom in scientific innovation to promote high quality development as the theme and focuses on cutting edge research fields including Modern Management and Education Technology MMET 2023 encourages the exchange of information at the forefront of research in different fields connects the most advanced academic resources in China and the world transforms research results into industrial solutions and brings together talent technology and capital to drive development The conference sincerely invites experts scholars business people and other relevant personnel from universities scientific research institutions at home and abroad to attend and exchange Reconsideration of Science and Technology III Liu Dachun, Yang Huili, Fan Shanshan, 2022-09-30 Drawing on debates from traditional and postmodern thoughts on science and technology the title builds a new theoretical framework to reconsider science and technology integrating the opposing viewpoints that either justify science or negate it As the third volume of a three volume set that proposes to reconsider science and technology and explores how the philosophy of science and technology responds to an ever changing world this final volume seeks to restore the cultural implications of science Across the six chapters the authors probe the prospect of a pluralistic scientific culture including discussions of diversified value choices the tension between reason and unreason other binary characteristics of scientific knowledge including objectivity and uniqueness universality and locality as well as the loss awakening and reconstruction of scientific culture The authors call for a transformation of scientific culture from a dominant culture to an affirmative one and envision a free and open world of science and technology The volume will appeal to scholars and students interested in the philosophy of science and technology the ideology of scientism and anti scientism modernism and postmodernism Marxist philosophy and topics related to scientific culture Methodological Practices in Social Movement Research Donatella Della Porta, 2014 Social movement studies have grown enormously in the last few decades spreading from sociology and political science to other fields of knowledge as varied as geography history anthropology psychology economics law and others With the growing interest in the field there has been also an increasing need for methodological guidance for empirical research This volume aims at addressing this need by introducing main methods of data collection and

data analysis as they have been used in past research on social movements. The book emphasises a practical approach presenting in each chapter specific discussions on the main steps of research using a certain method from research design to data collection and the use of information. In doing so dilemmas and choices are presented and illustrated within chapters following the same systemic approach.

Paperbound Books in Print, 1992 **The Publishers' Trade List Annual**, 1985 **Political Economy of Malaysia's Industrial Policy** Firdausi Suffian, 2021-02-22. This book examines the national automotive policy in Malaysia to help readers gain an understanding of the country's industrial policy making processes. Addressing a gap in analysis of the political economy of the national automotive policy, the research presented combines the new institutional theory and the developmental state approach to provide new insights into elite policymakers' measures to shield domestic automotive enterprises from pro-market reforms. The formation of the national car project marks a turning point for Malaysia's industrial development as a country which it envisions will lead to it becoming a major player in the global automotive market. However, the domestic institutional factors embedded in ethno-economic interests and patronage constrain national car makers, limiting their potential to grow and instead causing a slowdown in the industry. Allowing readers to understand the background to Malaysia's heavy industrialisation programme and the birth of its national car projects, this book critically discusses the significance of institutional context in policy outcomes and highlights how institutions and policies have impacted growth or decline. It is a valuable resource relevant to analysts, researchers, and students who are interested in the political economy of the national industrial policy and automotive industry in Malaysia and beyond.
