In a Third Letter to Dean Swift Jonathan Swift, 1726 *Floating Island* Jules Verne, 2020-12-14 First published in 1990

Although one of Jules Verne's lesser known novels as part of his Extraordinary Voyages collection there is still much to enjoy about *The Floating Island*. Written in 1895 towards the end of his career this is an adventure novel with elements of sci fi. A French string quartet traveling from San Francisco to their next engagement in San Diego is diverted to Standard Island. Standard Island is an immense man-made island designed to travel the waters of the Pacific Ocean. The wealth of residents of the island can only be measured in millions. The quartet is hired to play a number of concerts for the residents during their tour of the islands Sandwich Cook Society etc of the South Pacific. The island seems an idyllic paradise however it is an island divided in two. The left half's population is led by Jem Tankerton and is known as the Larboardites. The right half's population is led by Nat Coverley and is known as the Starboardites. Despite the obstacles encountered on their journey the two parties have a disagreement that threatens the future of the island itself.

The Last Frontier Karl S. Guthke, 2019-05-15 The existence of intelligent extraterrestrial life has been a subject of debate since the dawn of recorded history. *The Last Frontier* originally published in German in 1983 and now available in Helen Atkins's sensitive English translation traces the development of the idea that Earth is not the only planet inhabited by intelligent beings but that there might be a plurality or even an infinity of worlds with human or humanoid life. Focusing on the seventeenth to the twentieth century and taking into account theological philosophical scientific popular and literary writings from American British French and German sources Karl S Guthke demonstrates the continuing importance of this question to the process of human self definition.

The Flying Island, &c Jonathan Swift, 1726 *The Spectacle of the Growth of Knowledge and Swift's Satires on Science* Beat Affentranger, 2000 This is a revisionist study of seventeenth and eighteenth century satires on science with an emphasis on the writings of Jonathan Swift and to a lesser degree Samuel Butler and other satirists. To say as some literary commentators do that the satirists attacked only pseudo scientists who failed to employ the empirical method properly is to beg a crucial question: how could the satirists possibly have distinguished the genuine scientist from the crank? By a failsafe set of Baconian principles perhaps. No the matter is more complicated. I read the satiric literature on early modern science against a totally different understanding of what science is: how it came into being and how it developed. Satire has a decided advantage over scientific discourse. It can rely on common sense; scientific discourse often cannot. There is always a counter-intuitive element in the genuinely new. New knowledge is in some ways always at odds with received assumptions of what is possible, reasonable or probable. Satire on science I suggest can be seen as a systematic exploitation of that gap of plausibility. Natural philosophers of the late seventeenth and early eighteenth century were keenly aware of their discursive disadvantage and at times even hesitated to publish their material. They feared the satirists and the wits who they knew would find it easy to debunk their work on commonsense grounds. But commonsense and laughter are unreliable yardsticks for measuring

scientific merit Ironically the satirists and the natural philosophers shared some of the most fundamental epistemological assumptions of early English empiricism for instance the stereotypical Baconian assumption that knowledge about nature would come to us unambiguously once the mind was freed from preconception and bias It is an assumption about scientific method that is decidedly hostile towards speculative hypothesising Indeed the motto of the day was not bold speculation and learning from error but avoiding error at all costs Yet in practice error or what appeared to be erroneous was of course frequent for science is an essentially speculative enterprise Natural philosophers of the early modern period however were embarrassed by their failures and tried to explain them away The satirists on the other hand could prey on these mistakes and conclude that the work of the natural philosophers was purely speculative The reason for this rigid anti speculative epistemological stance I argue was a religious one having to do with the conception of nature as a divine book that could be read like Scripture This conflation of the epistemological and the theological is especially obvious in Swift In both his satirical and non satirical writings he is obsessed with proposing proper standards of interpretation and with criticising those whom he thought had corrupted these standards Dissenters and religious enthusiasts are taken to task for their misreading of Scripture for their corrupt religious doctrine which they erroneously claim to be based on Scripture and reason The natural philosophers are accused of some similar hermeneutic sin only they have committed their interpretive transgressions against the proper interpretive standard of the book of nature Where the natural philosophers claim to have found a new more accurate way of reading the book of nature Swift I argue sees only mis readings Rhetorically Swift s satires on religious dissent perpetuate the typically Tory High Church insinuation of sectarian and heretical sexual promiscuity In his satires on science Swift makes the same insinuation with respect to natural philosophers most vividly so in A Tale of a Tub and the flying island of Laputa The study concludes with a fresh look at Swift s rational horses in part four of Gulliver s Travels

Gulliver's Travels By Jonathan Swift NA NA,2016-04-30 This work includes the complete authoritative text with biographical historical contexts critical history and essays from five contemporary critical perspectives **The Bystander** ,1915 **The Story of the Heavens** Robert Stawell Ball,1890 **Eclectic Magazine** John Holmes Agnew,Walter Hilliard Bidwell, Henry T.
