DeVille,1968 *The Structure of Intelligence* Ben Goertzel,1993-06-24 0 0 Psychology versus Complex Systems Science Over the last century psychology has become much less of an art and much more of a science Philosophical speculation is out data collection is in In many ways this has been a very positive trend Cognitive science Mandler 1985 has given us scientific analyses of a variety of intelligent behaviors short term memory language processing vision processing etc And thanks to molecular psychology Franklin 1985 we now have a rudimentary understanding of the chemical processes underlying personality and mental illness However there is a growing feeling particularly among non psychologists see e g

Sommerhoff 1990 that with the new emphasis on data collection something important has been lost Very little attention is paid to the question of how it all fits together The early psychologists and the classical philosophers of mind were concerned with the general nature of mentality as much as with the mechanisms underlying specific phenomena But the new scientific psychology has made disappointingly little progress toward the resolution of these more general questions One way to deal with this complaint is to dismiss the questions themselves After all one might argue a scientific psychology cannot be expected to deal with fuzzy philosophical questions that probably have little empirical signifi cance It is interesting that behaviorists and cognitive scientists tend to be in agreement regarding the question of the overall structure of the mind

Consciousness Kenneth M. Sayre,1969 **Galileo, the Jesuits and the Medieval Aristotle** William A. Wallace,1991 The conventional opposition of scholastic Aristotelianism and humanistic science has been increasingly questioned in recent years and in these articles William Wallace aims to demonstrate that a progressive Aristotelianism in fact provided the foundation for Galileo s scientific discoveries The first series of articles supply much of the documentary evidence that has led the author to the sources for Galileo s early notebooks they show how Galileo while teaching or preparing to teach at Pisa actually appropriated much of his material from Jesuit lectures given at the Collegio Romano in 1598 90 The next articles then trace a number of key elements in Galileo s later work mainly relating to logical methodology and natural philosophy back to sources in medieval Aristotelian thought notably in the writings of Albert the Great and Thomas Aquinas La mise en opposition conventionnelle entre l aristot lisme scolastique et la science humaniste a t de plus en plus remise en question durant les derni res ann es Tout au long de ces articles William Wallace tente de d montrer que l aristot lisme progressif a en fait pourvu le fondement des d couvertes scientifiques de Galil e Le premier groupe d articles fournit la plupart des preuves document es qui ont men l auteur aux sources des premiers cahiers de notes de Galil e on y voit comment celui ci alors qu il enseignait ou s appr atait enseigner Pise s tait en fait appropri quantit de donne s issues de cours magistraux j suites qui avaient t donn s au Collegio Romano entre 1588 et 90 Les tudes suivantes retracent leur tour un certain nombre d elements clef des travaux ult rieurs de Galil e se rapportant plus particuli rement la m thodologie logique et a la philosophie naturelle jusqu leurs sources dans la pens e aristot licienne du Moyen Age notamment dans les crits d Albert le Grand et de Thomas d Aquin
