The Patient Doctor Ben Bravery, 2022-06-29 At the age of twenty eight with his Beijing based science communications business doing well and a new relationship blossoming Ben Bravery woke from a colonoscopy to be told he had stage 3 colorectal cancer As a scientist Ben understood the seriousness of his condition Cancer had quite literally whacked him in the guts after all But what he didn't expect was how being a patient and a young one at that would make him feel Why hadn't he been better prepared for the embarrassment and vulnerability of lying naked on the radiation table Why wasn't he warned about the sheer number of tubes he would discover coming out of his body after surgery Why did it feel like an imposition to ask doctors about his pain on their ward rounds And why did he have to repeat the same information to them over and over again During eighteen long months of treatment including aggressive chemotherapy Ben felt scared overwhelmed sometimes invisible and often alone As he recovered it struck Ben that after everything he'd been through he couldn't go back to his former career He needed a change and he wanted to make change He wanted to become a doctor He passed the entrance exam and dived headfirst into the challenges of medical school including an unrelenting timetable terrifying ward rounds and the difficulty of maintaining compassion under pressure Now driven by his experience on both sides of the healthcare system this patient turned doctor gives a no holds barred account of how he overcame the trauma of his illness to study medicine and shares what he believes student doctors doctors patients and their families need to do to ensure that the medical system puts the patient at the very heart of healthcare every day Honest powerful eye opening and sometimes heart wrenchingly funny this is an inspiring memoir that shows that no matter our situation we all need to be treated with care and compassion right until the very end

The Doctor's Recreation Series Charles Wells Moulton,1905 *The Cancer Experience* Roy B. Sessions,2012-04-05

Navigating the tumultuous waters of cancer treatment and decision making is difficult for all patients It is also difficult for doctors and other medical personnel This book deals with a variety of emotion related and ethics issues that form much of the basis of the world of cancer related medicine the responsibilities of the physician relative to truth full disclosure patient autonomy death and dying physician assisted suicide and suicide in general among cancer patients These and many other matters are discussed using real stories from the author's extensive personal career in working with cancer patients and their families This is not a book on treating cancer but instead is a work that seeks to stimulate a dialog about these issues as well as the spiritual aspects of hope and other factors relating to the plight of cancer patients and their families Written for health care professionals and cancer victims and their families alike the core of the book centers around questions of medical ethics doctor patient relationships decision making during cancer treatment from medical and patient points of view Given the emotional commitment and energy level required to work with cancer patients in a moral and ethical manner medical students and residents will ask themselves do I really want to be a cancer physician Can I handle the ups and downs of treating people who may or may not be destined to fight and lose the battle against this strong nemesis How will I answer the tough questions regarding medical approaches to cancer How will I respond to patients who indicate a desire to commit suicide or request my help in doing so What can I tell families whose loved one is choosing

treatments that will not help and will deteriorate his quality of life Basing his responses on the Oath of Hippocrates the author illustrates how adaptable this oath actually is when considering the secular society in which we function The Cancer Experience instructs doctors medical students and health care workers involved in cancer care on the proper role of medicine the role of the doctor and the opportunities for connecting with patients as they help them make decisions regarding treatment and end of life issues It helps patients understand the issues facing doctors as they assist them care for them and try to maintain both close personal relationships but enough emotional and professional distance in order to protect themselves from the stress and strain when medicine fails and patients must face the hardest choices Here the author promotes a return to traditional medical values that promote closer doctor patient relationships in an effort to promote trust civility and partnership
