China and the Internet Song Shi, 2023-12-15 Two oversimplified narratives have long dominated news reports and academic studies of China's Internet one lauding its potentials to boost commerce the other bemoaning state control and measures against the forces of political transformations This bifurcation obscures the complexity of the dynamic forces operating on the Chinese Internet and the diversity of Internet related phenomena *China and the Internet* analyzes how Chinese activists NGOs and government offices have used the Internet to fight rural malnutrition the digital divide the COVID 19 pandemic and other urgent problems affecting millions of people It presents five theoretically informed case studies of how new media have been used in interventions for development and social change including how activists battled against COVID 19 In addition this book applies a Communication for Development approach to examine the use and impact of China's Internet Although it is widely used internationally in Internet studies Communication for Development has not been rigorously applied in studies of China's Internet This approach offers a new perspective to examine the Internet and related phenomena in Chinese society

Riding the Tiger John Seidensticker, Peter Jackson, Sarah Christie, 1999-02-08 Beauty grace and power make the tiger one of the world's most loved animals yet it is precisely these

qualities that have been its downfall Poaching for skins and body parts loss of habitat and prey and conflicts between people and wild tigers have caused catastrophic declines in tiger numbers throughout their range If wild tigers are to survive through the next century we must act now Riding the Tiger is a comprehensive scientific and eminently readable account of the problems and possible solutions of securing a future for wild tigers Lavishly illustrated in full colour it is written by leading conservationists working throughout Asia It is a vital information resource for tiger conservationists in the field necessary reading for serious students of carnivore conservation and conservation biologists in general and an accessible overview of tiger conservation for general readers
