

Tiger Stalk

J. Lou Barnes

Tiger Stalk:

Tiger Stephen Mills, 2004 A rare look at a magnificent predator. Supplement: powerful, long lean and intense tigers are one of the world's most beautiful predators. Though fierce and efficient, an estimated 5,000 tigers are all that survive in the wild. Tiger provides a thorough understanding of this remarkable animal based on firsthand observations. Using stunning photography and maps, the book reveals how shrinking habitats and decreasing food supplies are forcing tigers to live in unnaturally high densities, often with deadly results. Tiger draws on the latest research and extensive field experience to deal with every aspect of its behavior: social structures, breeding patterns, and family life; martial arts like hunting tactics; dietary favorites and oddities; communication and interaction. Two hundred and fifty photographs capture tigers in range of activities: devouring prey in the jungle, at play with cubs, warding off scavengers at rest, and on the prowl. Fascinating commentary offers intriguing new ideas about supporting this critically endangered animal, a first step in ensuring that they never die out.

Tiger Moon Fiona Sunquist, Mel Sunquist, 2002-06 Tiger Moon is the powerful poetic story of the Sunquists' two years studying tigers in Nepal, traveling by elephant, avoiding a rhino attack, and learning to recognize individual tigers by roar. A new afterword tells the story of promising efforts to reconnect fractured Nepalese tiger habitats. Tigers Susan Schafer, 2001 Describes the physical characteristics, behavior, habitat, and endangered status of tigers. Tiger Facts Yves Earhart, 2025-02-18 Tiger Facts explores the captivating life of tigers, bridging their biological existence with their profound impact on human societies. Delving into the realms of biology, ecology, and cultural anthropology, the book illuminates the tiger's evolutionary journey, physical prowess, and diverse habitats across Asia. Understanding these apex predators is critical, given that a tiger's roar can be heard from up to two miles away and their stripes are as unique as human fingerprints. The book unfolds in three parts, beginning with the tiger's biological profile, including hunting techniques and life cycle. It then examines the tiger's ecological role and the challenges of habitat loss, before exploring the tiger's cultural significance in mythology, art, and conservation efforts. Tiger Facts highlights established scientific research, field studies, and expert interviews to present a holistic view. It connects to ecology, wildlife management, conservation biology, cultural anthropology, and environmental ethics, revealing how the tiger's fate is inextricably linked to human actions, thereby emphasizing the critical responsibility of conservation. Game Richard Hamilton, 1881 **The Secret Lives of Tigers** J. Lou Barnes, 2007-01-12 Describes the physical characteristics, behaviors, habitat, and life cycle of tigers. **Shikar Sketches** James Moray Brown, 1887 **A History of American Literature** Moses Coit Tyler, 1878 **A History of American Literature During the Colonial Period, 1607-1765** Moses Coit Tyler, 1881 **Annual Report of the American Historical Association** American Historical Association, 1896 **The Face of the Tiger** Charles McDougal, 1977 The Journal of the Bombay Natural History Society Bombay Natural History Society, 1924 *Island of Intrigue* Isabel Ostrander, 1918 Game Hawkeye, 1876 *Game, by Hawkeye* Richard Hamilton, 1876 *Large game shooting in Tibet,*
