**Time, Memory, and the Politics of Contingency** Smita A. Rahman, 2014-07-11 In recent years there has been an increased attention to temporality in political theory and such attention is sorely needed For too long political theory with the exception of occasional phenomenological forays has remained grounded in a particular experience of time as linear and sequential This book aims to unsettle the dominant framework by putting time itself and the experience of time in everyday life at the center of its critical analysis Smita Rahman focuses on the experience of time as one where past present and future intermingle with each other and refuse to adhere to a sequential structure Rather than trying to tame the flux of time this book places this out of joint experience of time at the center of its analysis of global politics Rahman takes the highly abstract concept of time and decenters it to speak to a wide range of political issues across disciplines She does so by exposing the cultural construction of the foundational concept of time in political theory and attending closely to the challenges of cultural incommensurability that it encounters in a globalized world of difference Specifically the book looks at interrogation practices in Afghanistan the challenges of coping with the burdens of collective memory in Algeria South Africa and Rwanda the difficulty of uncritically applying such a framework to the Muslim world through the language of secularism and finally at the beginnings of democratic emergence in Bangladesh to explore a politics of contingency By focusing on issues of contemporary global politics through the lens of political theory this book draws on literature across disciplines and explores the complex image of time by engaging the work of thinkers for whom time and memory have emerged as a critical issue of analysis and unpacking the politics of contingency that emerge from such a reading The book s new insights on political temporality will interest scholars of contemporary political theory comparative political theory critical theory human rights conflict studies and religion and politics

Time, Memory, and the Verbal Arts Dennis L. Weeks, Jane Susan Hoogstraal, 1998 Walter Ong pioneered the study of how orality and literacy mutually enrich each other in the evolution of human consciousness arguing that verbal communication moves from orality to literacy and on to what he has termed the secondary orality of radio and television The original essays in this volume explore the implications of Ong s work across the diverse fields of cultural history literary theory theology philosophy and anthropology These scholars maintain that Ong s view of orality not only changes our readings of ancient and medieval texts but that it also changes our understanding of the differing epistemologies of oral and literate cultures and of the coexistence of the oral and literate within a given culture

Time and Memory Christoph Hoerl, Teresa McCormack, 2001 The capacity to represent and think about time and the capacity to recollect the past are two of the most fundamental and least understood aspects of human cognition and consciousness This book throws new light on central issues in the study of the mind by uniting for the first time psychological and philosophical approaches dealing with the connection between temporal representation and memory Fifteen specially

written essays by leading psychologists and philosophers investigate the way in which time is represented in memory and the role memory plays in our ability to reason about time They offer insights into current theories of memory processes and of the mechanisms and cognitive abilities underlying temporal judgements and draw out fundamental issues concerning the phenomenology and epistemology of memory and our understanding of time The chapters are arranged into four sections each focused on one area of current research I Keeping Track of Time and Temporal Representation II Memory Awareness and the Past III Memory and Experience IV Knowledge and the Past The Epistemology and Metaphysics of Time A general introduction gives an overview of the topics discussed and makes explicit central themes which unify the different philosophical and psychological approaches
