Women In Control:

Women with Control Renée Greenstein,2021-02-18 Cash transfers and women's control over decision-making and labor supply in Egypt El-Enbaby, Hoda,Gilligan, Daniel,Karachiwalla, Naureen,Kassim, Yumna,Kurdi, Sikandra,2019-12-23 Women s control over decision making within their family particularly regarding the use of household income can play an important and long lasting role in shaping their well being and that of their children Cash transfer programs often target women in order to increase their control over household resources Empirical evidence on the effectiveness of this approach is mixed and suggests the importance of local context We present evidence on the effect of cash transfers on women s control over decision making in the MENA region where little evidence is available and where cultural norms around women s roles differ from more studied regions Using a regression discontinuity approach we identify the impact of Egypt s Takaful national cash transfer program on women s control over decision making and labor supply Receiving cash transfers mostly reduced women s reported ability to influence household decisions particularly regarding child healthcare The loss of control over decision making was greater for women with less than primary education Other effects of the program include a decline in women s employment and an increase in men s involvement in spheres of decision making usually controlled by women These results are robust to changes in model specification We present suggestive evidence from mediation analysis that the negative effects on women s control over decision making was directly related to these declines in employment and increase in men s involvement in female spheres The negative findings are not wholly supported by complementary qualitative work in which women reported more positive perceptions of the program s impacts *Women's control over income and household spending decisions: A rapid review* Eissler, Sarah,Bryan, Elizabeth,2025-09-19 Often cited studies show that when women influence or control household spending decisions they tend to spend in ways that improve the welfare of their household However these studies are decades old and the most recent review of this evidence was published over a decade ago see Doss 2013 We present a rapid review of this literature since 2013 on women s relative bargaining power over household resource allocation and its relationship with key well being outcomes Specifically we review the evidence to answer the following questions 1 Does women s control over income within the household influence household expenditure patterns 2 Does the source of women s income matter for spending decisions and 3 Does the amount of women s income matter for spending decisions We employ a rapid review approach to identify research published since 2013 that focuses on how women who have influence or control over spending decisions allocate those resources and associations with well being outcomes Utilizing key search terms and clear selection criteria we identified 46 papers Most studies represent sub Saharan Africa They employed a range of methods and represented a mix of observational and experimental or quasi experimental designs Most studies did not specify the source of income but we did identify those focused on income from agricultural or off farm activities remittances and cash transfers Our review of the literature since 2013 has generally found evidence that is

consistent with the research prior to 2013 but more convincing as there has been an increase in causal evidence published. Compared to men, women prioritize spending on investments in children, their education, food, including more diverse and nutrient-dense foods, and on healthcare, regardless of income source. Overall, women's influence over resource allocation decisions tends to promote equitable distribution of money to boy and girl children. We see mixed results around how women prioritize investing in savings compared to men; several studies indicated women prioritize savings more than men but do so for different reasons, although one study in a matrilineal society indicated that women prioritize food budgets at the expense of building savings. And finally, there is consistent evidence that the share of household budgets spent on adult goods or vices, primarily alcohol and tobacco, reduces when women have higher relative bargaining power over how these resources are allocated. Few studies considered how the amount of money influenced women's ability to allocate it, suggesting that women may be able to influence spending over smaller amounts of resources compared to larger expenditures. To address gaps identified in the literature, future studies could look across income from different sources to understand whether women have greater influence or control over certain income streams compared to others or how the source of income may influence how the money is allocated. They could also explore the relative amount of income women can control and how women's control over income fluctuates as total household income changes. We recommend a systematic evidence review to assess the different levers influencing women's relative bargaining power over resource allocation within a household and understanding the outcomes of women's bargaining power.

Women's Rights Crista DeLuzio, 2009-11-12. A lively accessible collection of essays exploring the history of the struggle for women's rights in the United States from the colonial period to the present. The fight for women's rights was one of the first topics explored by women's historians when the field emerged in the 1970s. Current and authoritative *Women's Rights: People and Perspectives* shows just how complex and multifaceted our understanding of that fight has become. *Women's Rights* spans the breadth of American history from Native American women prior to colonization to women during the Revolution, Antebellum period, the Civil War, and the Gilded Age. Coverage of the 20th century moves from the Progressive Era to the Great Depression and World War II, from the emergence of modern feminism to the present. Throughout, it offers fascinating details of ordinary and extraordinary lives while charting the evolving roles of women in American society.

[Classic Readings and Cases in the Philosophy of Law](#) Susan Dimock, 2016-09-16. With over sixty cases as support, this text presents the philosophy of law as a perpetual series of debates with overlapping lines and cross connections. Using law as a focus to bring into relief many social and political issues of pressing importance in contemporary society, this book encourages readers to think critically and philosophically. *Classic Readings and Cases in the Philosophy of Law* centers on five major questions: What is law? What if any connection must there be between law and morality? When should law be used to restrict the liberty of individuals? To what extent should democratic states permit civil disobedience? What if anything justifies the infliction of punishment on those who violate the law? The
