[The Tiger Tank Story](#) Mark Healy, 2010-04-22 The famous Tiger tanks of the German Panzer forces were only available at the hard pressed front in modest quantities but this tiny number forged a legend out of all proportion to its size This fascinating programme plots the history of its conception and evolution against the background of World War Two tank development Expert analysis is provided by tank and military historians David Fletcher and Professor John Erickson and also includes new footage of surviving Tiger tanks

Wilbeck,2014-08-15 This thesis is a historical analysis of the combat effectiveness of the German schwere Panzer Abteilung or Heavy Tank Battalions during World War II During the course of World War II the German Army developed heavy tank battalions to fulfill the concept of breaking through enemy defenses so faster lighter mechanized forces could exploit the rupture These heavy tank battalions had several different tables of organization but were always centered around either the Tiger or the Tiger II tank They fought in virtually every theater of Europe against every enemy of Germany Ultimately the German military created eleven Army and three Waffen SS heavy tank battalions Of the Army battalions the German command fielded ten as independent battalions which were allocated to Army Groups as needed The German Army assigned the last heavy tank battalion as an organic unit of the elite Panzer Grenadier Division Grossdeutschland The Waffen SS

allocated all of their battalions to a different Waffen SS Corps Because these units were not fielded until late in 1942 they did not participate in Germany s major offensive operations that dominated the early part of World War II Germany s strategic situation after mid 1943 forced their military onto the defensive Consequently there are very few instances when heavy tank battalions attacked as a breakthrough force During the latter part of the war they were used in many different ways to provide defensive assistance along very wide frontages This study assesses the German heavy tank battalions as generally effective primarily because of the high kill ratio they achieved However based upon observations from a wide variety of examples this study also outlines several areas where changes may have increased their effectiveness
