DOUGH TEMPERING GUIDE

WHAT IS IT?

Dough tempering is the act of tempering your dough after mixing it to determine the duration of bulk fermentation.

WHY SHOULD I DO IT?

Dough tempering takes the guess work out of timing bulk fermentation. Using this chart you can determine exactly how long to bulk ferment your dough for a perfect crumb. No need to fret about under or over fermenting your loaves.

HOW DO I DO IT?

Use room temperature ingredients and mix together your dough as you normally would. After mixing use a reliable kitchen thermometer and record the temperature of the dough. Refer to the chart to determine how long to bulk ferment the dough. *We want to use room temperature ingredients so the temperature remains consistent and we don't experience fluctuations in the temperature of the dough through bulk fermentation.*
