**Time and Relational Theory** C.J. Date,Hugh Darwen,Nikos Lorentzos,2014-08-13 Time and Relational Theory provides an in depth description of temporal database systems which provide special facilities for storing querying and updating historical and future data Traditionally database management systems provide little or no special support for temporal data at all This situation is changing because Cheap storage enables retention of large volumes of historical data in data warehouses Users are now faced with temporal data problems and need solutions Temporal features have recently been incorporated into the SQL standard and vendors have begun to add temporal support to their DBMS products Based on the groundbreaking text Temporal Data the Relational Model Morgan Kaufmann 2002 and new research led by the authors Time and Relational Theory is the only book to offer a complete overview of the functionality of a temporal DBMS Expert authors Nikos Lorentzos Hugh Darwen and Chris Date describe an approach to temporal database management that is firmly rooted in classical relational theory and will stand the test of time This book covers the SQL 2011 temporal extensions in depth and identifies and discusses the temporal functionality still missing from SQL Understand how the relational model provides an ideal basis for taming the complexities of temporal databases Learn how to analyze and evaluate commercial temporal products with this timely and important information Be able to use sound principles in designing and using temporal databases Understand the temporal support recently added to SQL with coverage of the new SQL features in this unique accurate and authoritative reference Appreciate the benefits of a truly relational approach to the problem with this clear user friendly presentation

**Database and Expert Systems Applications** Heinrich C. Mayr,Jiri Lazansky,Gerald Quirchmayr,Pavel Vogel,2003-06-29 th DEXA 2001 the 12 International Conference on Database and Expert Systems Applications was held on September 3 5 2001 at the Technical University of Munich Germany The rapidly growing spectrum of database applications has led to the establishment of more specialized discussion platforms DaWaK conference EC Web conference and DEXA workshop which were all held in parallel with the DEXA conference in Munich In your hands are the results of much effort beginning with the preparation of the submitted papers The papers then

passed through the reviewing process and the accepted papers were revised to final versions by their authors and arranged with the conference program All this culminated in the conference itself A total of 175 papers were submitted to this conference and I would like to thank all the authors They are the real base of the conference The program committee and the supporting reviewers produced altogether 497 referee reports on average of 2.84 reports per paper and selected 93 papers for presentation Comparing the weight or more precisely the number of papers devoted to particular topics at several recent DEXA conferences an increase can be recognized in the areas of XMS databases active databases and multi and hypermedia efforts The space devoted to the more classical topics such as information retrieval distribution and Web aspects and transaction indexing and query aspects has remained more or less unchanged Some decrease is visible for object orientation

Systems Analysis and Design for Advanced Modeling Methods: Best Practices Bajaj, Akhilesh, Wrycza, Stanislaw, 2009-04-30 Covers research in the area of systems analysis and design practices and methodologies **Database Schema Evolution and Meta-Modeling** Herman Balsters, Bert de Brock, Stefan Conrad, 2003-06-29 The Ninth International Workshop on Foundations of Models and Languages for Data and Objects FoMLaDO took place in Dagstuhl Germany September 18-21 2000 The topic of this workshop was Database schema Evolution and Meta Modeling this FoMLaDO Workshop was hence assigned the acronym DEMM 2000 These post proceedings contain the revised versions of the accepted papers of the DEMM 2000 workshop Twelve regular papers were accepted for inclusion in the proceedings The papers address the following issues Consistency of evolving concurrent information systems Adaptive specifications of technical information systems Change propagation in schema evolution of object based systems Evolving software of a schema evolution system Logical characterization of schema evolution Conflict management in integrated databases Evolving relation schemas Conceptual descriptions of adaptive information systems OQL extensions for metadata access Metamodeling of schema evolution Metrics for conceptual schema evolution Incremental datawarehouse construction In addition to the regular papers there is an invited paper by Can Turker on schema evolution in SQL99 and object relational databases Acknowledgements We wish to thank the program committee members for their work on reviewing the submitted papers We also wish to thank all authors for submitting papers to this workshop Moreover all participants of the workshop are thanked for contributing to lively discussions Thanks also to Elke Rundensteiner who delivered an invited talk on the SERF project concerning extensible database transformations *Advanced Information Systems Engineering* Klaus R.
