June Maker,David C. Berliner,1986      **Students of Color and the Achievement Gap** Richard R. Valencia,2015-03-05 Students of Color and the Achievement Gap is a comprehensive landmark analysis of an incontrovertible racialized reality in U S K 12 public education the relentless achievement gap between low socioeconomic students of color and their economically advantaged White counterparts Award winning author and scholar Richard Valencia provides an authoritative and systemic treatment of the achievement gap focusing on Black and Latino Latina students He examines the societal and educational factors that help to create and maintain the achievement gap by drawing from critical race theory an asset based perspective and a systemic inequality approach By showing how racialized opportunity structures in society and schools ultimately result in racialized patterns of academic achievement in schools Valencia shows how the various indicators of the achievement gap are actually symptoms of the societal and school quality gaps Following each of these concerns Valencia provides a number of reform suggestions that can lead to systemic

transformations of K 12 education Students of Color and the Achievement Gap makes a persuasive and well documented case that school success for students of color and the empowerment of their parents can only be fully understood and realized when contextualized within broader political economic and cultural frameworks *An Evaluation (and Vindication?) of Lewis Terman* Russell Warne,2019 Lewis Terman is widely seen as the father of gifted education yet his work is controversial Terman s mixed legacy includes the pioneering work in the creation of intelligence tests the first large scale longitudinal study and the earliest discussions of gifted identification curriculum ability grouping acceleration and more However since the 1950s Terman has been viewed as a sloppy thinker at best and a racist sexist and or classist at worst This article explores the most common criticisms of Terman s legacy an overemphasis on IQ support for the meritocracy and emphasizing genetic explanations for the origin of intelligence differences over environmental ones Each of these criticisms is justified to some extent by the historical record and each is relevant today Frequently overlooked however is Terman s willingness to form a strong opinion based on weak data The article concludes with a discussion of the important lessons that Terman s work has for modern educators and psychologists including his contributions to psychometrics and gifted education his willingness to modify his opinions in the face of new evidence and his inventiveness and inclination to experiment Terman s legacy is complex but one that provides insights that can enrich modern researchers and practitioners in these areas **Journal of Experimental Pedagogy and Training College Record** ,1927 [Genetic Studies of Genius ...: The promise of youth](#) ,1930 **Journal of Applied Psychology** Granville Stanley Hall,1921 [Research bulletin](#) ,1929 **An Annotated Bibliography of Studies Relating to Spelling** Thomas George Foran,1930 **The Birth Control Review** Margaret Sanger,1927 [The Psychology of Play Activities](#) Harvey Christian Lehman,Paul Witty,1927 *'Gifted Children' in Britain and the World* Jennifer Crane,2025-01-28 This is an open access title available under the terms of a CC BY NC ND 4 0 International licence It is free to read on Oxford Academic and offered as a free PDF download from OUP and selected open access locations The idea that a child is intellectually gifted has a social and cultural history This book analyses that social history at multiple scales and makes the voices of the gifted young themselves central through examination of their poetry letters and life writing In daily encounters those labelled gifted sometimes loved this label and felt special in comparison to peers at school and siblings at home For others gifted was a silly or embarrassing label and many questioned the idea of separating off young people in terms of intelligence as well as the specific forms of testing being used Ideas of the gifted child also reshaped family lives parents dedicated time to providing special leisure spaces for those thought of as gifted running them in their own homes and taking their children significant distances to spend time with others that were also gifted Voluntary organisations were critical here as the network through which young people and adults encountered the term gifted and lived and created it relationally through interactions with one another Voluntary organisations looking to gain attention and visibility also critically shaped the idea that the gifted young were elites of the future central to answering

challenges of economic decline global warfare or humanitarian aid The hopes placed on gifted children between the 1960s and the 1990s were often sky high yet many gifted young still felt that the community wasted their talents and did not support them This book then provides new perspectives on the tensions between elitism and equality in modern Britain It also offers vivid stories of optimism hope disappointment and criticism in which young people themselves play a central role
