Lindsay,2018-02-23 The Girl's Own Annual ,1895 **The American Florist** ,1925 **Multispecies Storytelling in Intermedial Practices** Ida Bencke,Jørgen Bruhn,2022-03-08 Multispecies Storytelling in Intermedial Practices is a speculative endeavor asking how we may represent relay and read worlds differently by seeing other species as protagonists in their own rights What other stories are to be invented and told from within those many tongued chatters of multispecies collectives Could such stories teach us how to become human otherwise Often the human is defined as the sole creature who holds language and consequently is capable of articulating representing and reflecting upon the world And yet the world is made and remade by ongoing and many tongued conversations between various organisms reverberating with sound movement gestures hormones and electrical signals Everywhere life is making itself known heard and understood in a wide variety of media and modalities Some of these registers are available to our human senses while some are not Facing a not so distant future catastrophe which in many ways and for many of us is already here it is becoming painstakingly clear that our imaginaries are in dire need of corrections and replacements How do we cultivate and share other kinds of stories and visions of the world that may hold promises of modest yet radical hope If we keep reproducing the same kind of languages the same kinds of scientific gatekeeping the same kinds of stories about our place in nature we remain numb in the face of

collapse Multispecies Storytelling in Intermedial Practices offers steps toward a self critical multispecies philosophy which interrogates and qualifies the broad and seemingly neutral concept of humanity utilized in and around conversations grounded within Western science and academia Artists activists writers and scientists give a myriad of different interpretations of how to tell our worlds using different media and possibly gives hints as to how to change it too
