Moss, 2024-06-14 Many historians have examined the French labor movement but few have gone beyond chronicling unions strikes and personalities to undertake a concrete analysis of workers aims in their historical context Searching for what Marx called the real movement of the working class Bernard H Moss presents a sophisticated revisionist interpretation that uncovers a core ideology of social vision underlying the many changes and variations in French socialism To define this ideology and delineate its social base Moss cuts through conventional distinctions between artisans and proletarians and between anarchism and socialism to derive an intermediate category the federalist trade socialism of skilled workers Originally manifested in the trade movement for producers associations and cooperatives this socialism eventually found revolutionary expression in Bakuninism possibilism Allemanism and revolutionary syndicalism The social base of this movement was the skilled craftsmen undergoing a process of proletarianization In *The Origins of the French Labor Movement* Moss rehabilitates ideology both as a vital force in history and as a serious subject for scientific history He proposes important revisions in our understanding of French politics and society in the nineteenth century and suggests a new approach to socialist ideology not as abstract theory but as the result of historical experience and process This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1976 *The French Labor Movement*, 1966 *A History of the French Labor Movement*

Moss,1984 **A History of the French Labor Movement, 1936-1947** Robert Louis Flavin,1959 A History of the French Labor Movement (1910-1923) Marjorie Ruth Clark,1930 **A Genetic Study of the French Labor Movement and Its Doctrines with Emphasis on Contemporary Trends** Leon Andrew Dale,1949 **Every Factory a Fortress** Michael Torigian,1999 French trade unions played a historical role in the 1930s quite unlike that of any other labor movement Against a backdrop of social unrest parliamentary crisis and impending world war industrial unionists in the great metal fabricating plants of the Paris Region carried out a series of street mobilizations factory occupations and general strikes that

were virtually unique in Western history The unionization of the metal industry following a series of anti fascist demonstrations and plant seizures would constitute the defining episode in modern French labor history and one of the great chapters in European social history Yet little is known of these extraordinary events With a style that captures the vivid character of these experiences *Every Factory a Fortress* tells the story of the Paris metal workers who succeeded in organizing the largest Communist union in the Western world reshaping the parameters of French social relations and ultimately altering the course of French destinies **The Origins of the French Labor Movement 1830-1924** ,1980
