[A Scientific Demonstration of the Future Life](#) Thomson Jay Hudson, 1895 **The Future Affects the Past**

Tonnerre, 2013-06-04 Music and nature inspire my writings so I traveled extensively during the writing process of this book I began writing this philosophy treatise at the heart of America by the banks of the Missouri River where I used to drown myself in the magnificent music of the wilderness when I went on my evening walks I would stroll solo in the woods and emerge to rest on a bench facing an ocean blue sky and abysmal thoughts would come to me of their own accord like d j vus There I would sit and sup on the cool evening breeze and witness our great golden star fall behind the distant red horizon like a sinking ship and the beatific and tragic sight of that dying day would fill me up with emotions In that solitude where a person hears their own thoughts speak loudest I would give into a deep ocean of contemplation and examine the nature of the world like a tyrant beholding an atlas of the world I would ask myself deep philosophical questions like if a seed growing into a tree and a tree growing into a forest is only a brief moment in the history of time then how much shorter is my life in this world And if earth is only a dust particle floating in the desert of space then how infinitesimal am I in the infinite infinities and diversities of nature Who or what put me in this island called earth Am I just another artifact in the museum of the universe or am I something higher than a flower or a bird or a crystal I would compile thoughts until my thoughts thoughts reach the limit and my mind nearly faints from exhaustion I read nature and wrote at the park until the moon rose and stars arrived to light up the heaven like an army of glowing fireflies Portions of the book were written by the snowy mountain tops of Utah and at the beaches of Lake Michigan whose pure blue water ebbs away and flows towards the windy metropolis of Chicago I then traveled abroad to Africa to collect and recollect my thoughts in the primordial Garden of Eden in South Sudan with its billions of birds animals and insect s chirping buzzing squealing screaming and singing in the orchestra of life playing in the theatre of Nature I meditated and contemplated about life by the shores of Lake Victoria which reflects the white clouds of Uganda s clear sky in its surface like a gigantic mirror on the ground Then I went on an intellectual mecca to Europe visiting intellectualistic sites like the British Library where Marx wrote the most consequential book of modernity I also went to the British Museum and Oxford University to affirm and confirm the contents of this discourse The book was actually edited in London It is called The Future Affects The Past because the subject of d j vu is the object the other subjects of the book revolve around It was premeditated by fate before I was even born that I would script this book Prior to taking my first breath of life before my heart beat for the first time in this world I already wrote this book and it was a matter of time before destiny made it occur into actuality Wisely so I do not call this book my own because I know that infinity is its source just like the infinitely ancient and creative Nature is the source of all arts and inventions

Nature had copyright on all things This book is an avalanche of past and present knowledge it s a culmination of precedent human wisdom it s a synthesis of the insights of many books and many minds I am just a instrument used by greater Nature Nature is a tremendous bow that shoots arrows from infinite distance away and infinite time ago and I am only one of Nature s arrows of fire who live to illuminate the dark world of ignorance with philosophical knowledge System of positive polity: Theory of the future of man, with an appendix consisting of early essays on social philosophy Auguste Comte,1877

Human Biology and Racial Welfare Edmund Vincent Cowdry,1930 **The Future of Life and the Future of our Civilization** Vladimir Burdyuzha,2006-10-12 This book covers the proceedings of The Future of Life and the Future of our Civilization symposium held in Frankfurt Germany in May 2005 **The Future Evolution of Man: the Divine Life Upon Earth. Compiled with a Summary and Notes** Aravinda Ghosha,P. B. Saint-Hilaire,1963 **The Future of Global Nuclearization** Thomas R. McFaul,1985 Collier's ,1929 Eugenical News ,1927 **The Future of Technological Civilization** Victor C. Ferkiss,1974 Teilhard and the Future of Humanity Thierry Meynard,2006 Fifty years after his death the thought of the French scientist and Jesuit Pierre Teilhard de Chardin 1881 1955 continues to inspire new ways of understanding humanity s future Trained as a paleontologist and philosopher Teilhard was an innovative synthesizer of science and religion developing an idea of evolution as an unfolding of material and mental worlds into an integrated holistic universe at what he called the Omega Point His books such as the bestselling The Phenomenon of Man have influenced generations of ecologists environmentalists planners and others concerned with the fate of the earth This book brings together original essays by leading experts who reflect on Teilhard s legacy for today s globalized world They explore such topics as the idea of God and the person quantum reality and Teilhard s vision spiritual resources for the future politics and economics and a charter for co evolution Outlook and Independent ,1929 Annual Report of the Board of Regents of the Smithsonian Institution Smithsonian Institution,1928 Reports for 1884 1886 87 issued in 2 pts pt 2 being the Report of the National Museum Education of the Future Norman C. Dowsett,Sita Ram Jayaswal,1976 **Science, Virtue, and the Future of Humanity** Marc D. Guerra,Peter Augustine Lawler,2015-10-08 Science Virtue and the Future of Humanity addresses each of the key public policy issues of our techno future from the perspective of deeply informed and philosophically inclined public intellectuals Among the issues addressed are the detachment of our idea of justice from any credible foundation Tocqueville s prescience on how a cognitive elite might be the aristocracy to be most feared in our time robotization and the possibility of being ruled by morally challenged robots organ markets the degradation of liberal education by obsessive techno enthusiasm biotechnology and biological determinism the birth dearth and the inevitable erosion of our entitlements the possibility that our techno domination is basically an unfolding of the Lockean logic of our foundation and the future of the free exercise of religion in an aggressively libertarian time All in all this book should provoke widespread discussion about the relationship between scientific technological progress and the one true moral spiritual

progress that takes place over the course of every particular human life
