Yarnall, 2017-07-05 John La Farge A Biographical and Critical Study is the first biography in a century of the American painter illustrator muralist stained glass artist and writer Examining La Farge's career from his youth to his late rebound as a decorative artist from New York City and New England to Europe to Japan to the South Seas this is also the only biography to date composed independently of the artist and his estate Drawing on primary documentation culled from archives and contemporary newspapers and journals the biography thoroughly documents La Farge's career and artwork Earlier biographies avoided the darker aspects of his complex and conflicted life which had dramatic effects on his work The study also offers critical analysis of the artist's works showing influences from other artists and giving contemporary and modern responses La Farge authority James L Yarnall scrutinizes how posterity has viewed the artist throughout the century since his death The book is copiously illustrated with black and white and color images ***A War of Logistics*** Charles R. Shrader, 2015-10-23 Following the French reoccupation of Indochina at the end of World War II the pro Communist Vietnamese nationalists or Viet Minh launched a grassroots insurgency that erupted into a full fledged war in 1949 After nearly ten years of savage combat the western world was stunned when Viet Minh forces decisively defeated the French Union army at the battle of Dien Bien Phu in May 1954 Logistics dominated every aspect of the First Indochina War dictating the objectives the organization of forces the timing and duration of the operations and even the final outcome In *A War of Logistics* Charles R Shrader meticulously examines both French Union and Viet Minh logistical units during the period of active conventional warfare as well as external support provided to the French by the United States and to the Vietnamese by China Although the Vietnamese had few advantages over their opponents their military leaders brilliantly employed a highly committed network of soldiers and civilians outfitted to accommodate the challenging terrain on which they fought Drawing on extensive research such as declassified intelligence documents the reports of French participants and accounts by Viet Minh leaders including Vo Nguyen Giap and Ho Chi Minh *A War of Logistics* provides in depth coverage of the often ignored but critically important topic of logistics in modern military campaigns ***Airborne Landing to Air Assault*** Nikolaos Theotokis, 2020-07-30 Many books have been written about military parachuting in particular about famous parachute operations like Crete and Arnhem in the Second World War and notable parachute units like the British Parachute Regiment and the US 101st Airborne Division but no previous book has covered the entire history of the use of the parachute in warfare That is why Nikolaos Theotokis's study is so valuable He traces in vivid detail the development of parachuting over the last hundred years and describes how it became a standard tactic in twentieth

century conflicts As well as depicting a series of historic parachute operations all over the world he recognizes the role of airmen in the story for they were the first to use the parachute in warfare when they jumped from crippled aeroplanes in combat conditions Adapting the parachute for military purposes occurred with extraordinary speed during the First World War and by the time of the Second World War it had become an established technique for special operations and offensive actions on a large scale The range of parachute drops and parachute led attacks was remarkable and all the most dramatic examples from the world wars and lesser conflicts are recounted in this graphic and detailed study The role played by parachute troops as elite infantry is also a vital part of the narrative as is the way in which techniques of air assault have evolved since the 1970s
