The Postmodern Brain:

The Postmodern Brain Gordon G. Globus, 1995-05-18 This interdisciplinary work discloses an unexpected coherence between recent concepts in brain science and postmodern thought A nonlinear dynamical model of brain states is viewed as an autopoietic autorhoetic self organizing self tuning eruption under multiple constraints and guided by an overarching optimization principle which insures conservation of invariances and enhancement of symmetries The nonlinear dynamical brain as developed shows quantum nonlocality undergoes chaotic regimes and does not compute Heidegger and Derrida are appropriated as dynamical theorists who are concerned respectively with the movement of time and being Ereignis and text Diff rance The chasm between postmodern thought and the thoroughly metaphysical theory that the brain computes is breached once the nonlinear dynamical framework is adopted The book is written in a postmodern style making playful opportunistic use of marginalia and dreams and presenting a nonserial surface of broken complexity Series A

Spiritual Intelligence and the Neuroplastic Brain Charles W. Mark Ph. D., Charles W. Mark, 2010 Our brains are getting wired differently in the world of digital technology information revolution and in the inter cultural world of global society Think of the new vocabulary Global brain collective intelligence global village and cyberspace That should tell us something about the neural rewiring that is taking place inside of our brains whether or not we are aware of it The fact that the human brain changes throughout a person s life in response to intellectual stimulation physical exercise exposure to new cultural environments learning opportunities and challenges is a revolutionary discovery Till twenty years ago neuroscientists believed in the conventional theory that the brain s ability at making new neural connections stopped before a child entered adolescence That is the old dogma There is a Second Copernican Revolution taking place inside of our brains writes the author quoting Carl Zimmer Some experts are suggesting that we are already living in what Richard Restack calls the neurosociety Ray Kurzweil the futurist is predicting that by 2045 A D human beings will be living in an era of singularity when non biological machines invented by human brains and human ingenuity are going to outsmart human intelligence billions of times What is going to be the fate of the human spirit human spirituality the feeling of connection to a force and power that is greater than us God our ability to use spiritual imagination and our intelligence Are we progressively moving away from religion and community based spirituality into the spirituality of different strokes for different folks In his groundbreaking book *Spiritual Intelligence and The Neuroplastic Brain A Contextual Interpretation of Modern History* Charles W Mark takes the reader on a journey through modern history and shows the glimpse of what is to come <http://www.spiritualityintelligence.com>

God and Religion in the Postmodern World David Ray Griffin, 1988-12-20 The naturalistic theism presented in this book is addressed to readers who have found liberal theology empty or who believe that one cannot be religious and fully rational and empirical at the same time Griffin shows that the postmodern view is more empirical and rational than that of late modern materialism This is not a return to early modern dualistic supernaturalism The mechanism and sensationalism of Descartes and Newton precluded a real union of religion and science Griffin's postmodernism offers a deeply religious and fully scientific theology providing a new basis for spiritual discipline and for a pacific mortality that could reverse the militarism of modernity Griffin proposes a revisionary constructive postmodern theology challenging the deconstructive philosophy that calls itself postmodern and leads to relativism and nihilism

Sociology, Science, and the End of Philosophy Sal Restivo, 2017-07-06 This book offers a unique analysis of how ideas about science and technology in the public and scientific imaginations in particular about maths logic the gene the brain god and robots perpetuate the false reality that values and politics are separate from scientific knowledge and its applications These ideas are reinforced by cultural myths about free will and individualism Restivo makes a compelling case for a synchronistic approach in the study of these notoriously hard cases arguing that their significance reaches far beyond the realms of science and technology and that their sociological and political ramifications are of paramount importance in our global society This innovative work deals with perennial problems in the social sciences philosophy and the history of science and religion and will be of special interest to professionals in these fields as well as scholars of science and technology studies

Pathology and the Postmodern Dwight Fee, 2000-02-11 This is a wonderful volume powerfully written timely insightful and filled with major pieces the passion intellectual rigor and sense of history found here promises to shape this field in the decades to come This volume sets the agenda for the future Norman K Denzin University of Illinois A beautifully crafted manuscript which reinvigorates the rather stale debate between the traditionalists and the anti psychiatry schools of thought For all those working in mental health arenas the journeying through this text will be highly rewarding indeed Stick with it Mental Health Care This is a book which will appeal to those interested in theoretical debates rather than to practitioners who may find it heavy weather if they have not had the time or resources to engage with what are often quite difficult and often dense writings British Journal of Social Work This book presents a clarity that is vivid This book would be a good place for psychiatrists to start British Journal of Psychiatry Pathology and the Postmodern explores the relationship between mental distress and social constructionism using new work from eminent scholars in the fields of sociology psychology and philosophy The authors address how specific cultural economic and historical forces converge in contemporary psychiatry and psychology how new syndromes subjectivities and identities are being constructed and deconstructed in technological culturally mediated and hyper reflexive contexts and what new critiques of positivism and new understandings of pathology seem viable given these still emerging scenarios Building upon work in such areas as labelling theory feminist studies

Since the brain seeks for patterns to learn something well the brain needs to recognize and categorize something and know what paradigm it fits into It is a biological fact that a human brain is always in need of structure or in other words humans are in search of the truth through which they may organize their perceptions and lives But what happens if this particular construct of the truth and reality is disturbed through representations that cause a human being to question his assumptions In time a chaos in mind will ensue which will have him repeatedly reconsidering his construct of the truth The same happens to Briony in and the reader of *Atonement* Briony subsequently finds herself unable to deal with contradiction and imposes an interpretative order on events Just like Briony the reader establishes a construct of the truth and a meaning for himself by assembling the representations of the book in an order to arrive at a point where they make sense The reader who has been led to assume a version of truth in which Robbie and Cecilia are reunited has to accept the falsity of this assumption when he she arrives at the third part of *Atonement* in which Briony reveals that Robbie and Cecilia were never able to meet again because both of them died before they could do so Such an abrupt unraveling of the reader s constructed version of the truth lead him to reconsider all previously assumed beliefs He has to go back over the story to search for a construction of the truth that makes sense to him again This seminal point in *Atonement* stands for the
