The Anthropology of Human and Planetary Health

Merrill Singer, 2025-03-19 This text introduces undergraduate and graduate students in health or environment related classes to the mounting crisis of syndemics through the lens of planetary health The concept of syndemics developed by the author and now in wide use across multiple health related disciplines focuses attention on the adverse synergistic interaction of two or more diseases or other health conditions promoted or facilitated by social and or environmental conditions The planetary health framework is an emerging holistic medical rethinking of our understanding of health It seeks to identify the safe environmental limits within which humanity and other species can flourish on our increasingly imperiled planet This book offers useful conceptual tools and frameworks for developing a comprehensive understanding of approaches needed to address the health risks of our changing world The unique coverage of this book is its careful examination of ecosyndemics around the world in light of the growing recognition that on a heavily disrupted planet a narrow focus on human health is inadequate Under these circumstances a comprehensive planetary health framework is needed This approach seriously considers the interconnected nature of human health animal and plant health and the health of the world's ecosystems Highly descriptive with numerous cases of the planetary health crisis the textbook is written in a student friendly and accessible way and is an important resource for coursework across environment and health related subjects Creation's

Diversity Willem Drees, Hubert Meisinger, Taede Smedes, 2008-05-01 This collection of substantial essays explores the question of how to relate environmental engagement in the context of religious convictions In the first part of the book A Diversity of Visions of Creation six essays address various views of creation In the second part of the book Sustaining Creation's Diversity the concept of sustainability is analyzed critically given the dynamic character of natural reality as unveiled by the sciences This is followed by some reflections on ethical and theological considerations regarding the idea that we ought to sustain diversity

Values and the Environment Yvonne Guerrier, 1995 This multidisciplinary study examines the ways in which we value the environment It explores conceptual issues policy dilemmas that arise when different sets of values conflict and how values have changed over the years due to further education and a growing awareness of environmental problems

Counterculture Green Andrew G. Kirk, 2007 For many it was more than a publication it was a way of life The Whole Earth Catalog billed itself as Access to Tools and it grew from a Bay Area blip to a national phenomenon catering to hippies do it yourselfers and anyone interested in self sufficiency independent of mainstream America now known as living off the grid In recovering the history of the Catalog's unique brand of environmentalism historian Kirk recounts how Stewart Brand and the Point Foundation promoted a philosophy of pragmatic environmentalism that celebrated technological achievement human ingenuity and sustainable living Kirk shows us that Whole Earth was more than a mere counterculture fad At a time when many of these ideas were seen as heretical to a predominantly wilderness based movement it became a critical forum for environmental alternatives and a model for how complicated ecological ideas
