Life! Why We Exist... and What We Must Do to Survive Martin G. Walker, 2007-02 Have you ever wondered why we re here what it all means In *Life Why We Exist And What We Must Do to Survive* Martin Walker reveals that the laws of space and time shape our form and purpose and that by acting on this purpose we can ensure the continued survival of life on earth Life guides us toward the inescapable conclusion that life s persistence is our number one goal this goal not only shapes everything we do think and feel but holds our future in the balance With its compelling and fascinating description of the origins of morality spirituality politics and love Life stands on its own as a work of great literature In its contribution to human understanding it is the most important book since Darwin s *The Origin of Species* Why do we exist Why does anything exist Rationalists would argue that the answer lies in a complete and comprehensive understanding of the physical aspects of the universe Those with a more spiritual outlook might claim that science only tells part of the story that the ultimate answer rests on faith And philosophers may raise an eyebrow at any attempt to achieve an ultimate answer But what if we were to trace a path from the origins of the universe to the present day examining how the forms of existence have appeared and developed over time would we be able to discern some pattern and purpose that is otherwise obscure Martin Walker has spent his life seeking to understand why things are the way they are Martin studied Physics at St John s College Oxford and now lives in Brooklyn New York with his wife Hope his daughter Dorothy and his son Zane The idea that the meaning of life can be found in the fundamental principles of existence came to him during a waking dream on a trans Atlantic flight Martin did not rest until he had uncovered the principles that shape our dreams hopes and fears In *Life* he shares the fruits of his discovery Part scientist part philosopher part poet Martin succeeds in bridging the gap between science and spirituality in prose that is compelling inspirational and seductive
