Time Dimension An Interdisciplinary Guide:

The Time Dimension T K. Das,1990-04-17 This is the first comprehensive bibliography of temporal scholarship research on the subject of time and the phenomenon of time itself As the author notes in his introduction the nature of research insights on the subject of time is difficult to comprehend within the confines of any specific discipline since relevant materials are scattered throughout the literature in numerous scholarly fields By bringing together the most significant published works in a wide variety of disciplines this unique compendium enables scholars and researchers to look beyond their own particular area of expertise when selecting appropriate resource materials Throughout the focus is on the time dimension itself as a problematic or researchable phenomenon rather than on narrow topics such as time management time series analysis or forecasting Organized by discipline the work begins with an initial chapter that lists general works on the time dimension Nineteen chapters then list works in particular disciplines ranging from anthropology and culture to biology economics futures studies history linguistics management studies psychology and more The final chapter lists miscellaneous entries which could not be categorized into any of the specific disciplinary headings Within each chapter entries are arranged alphabetically by author or editor Nearly all sources are from scholarly journals and books

Time Issues in Strategy and Organization T. K. Das,2019-10-14 Strategy science addresses diverse issues with interdisciplinary approaches impacting hybrid organizations and traditional categories This book series expands research areas and theoretical approaches The volume covers topics like future orientation real time management strategic leadership and open innovation strategies

Managing the Future Haridimos Tsoukas,Jill Shepherd,2009-02-09 In this book leading authors explore ways in which organizations can develop their ability to manage the future An exploration of the ways in which organizations can develop their ability to manage the future Consists of ten papers written by authors from both sides of the Atlantic and from Asia all of whom are distinguished scholars in the fields of strategy or organizational learning Addresses key questions about how organizational foresight can be conceptualized and developed and the extent to which it is possible The papers are prefaced by a foreword from Spyros Makridakis and an introduction from the editors Helps to shape a new research agenda and so will be of interest to academics as well as to students and practitioners

The TSQ2 Temporal Query Language Richard T. Snodgrass,2012-12-06 Temporal databases have been an active research topic for at least fifteen years During this time several dozen temporal query languages have been proposed Many within the temporal database research community perceived that the time had come to consolidate approaches to temporal data models and calculus based query languages to achieve a consensus query language and associated data model upon which future research can be based While there were many query language proposals with a diversity of language and modeling constructs common themes kept resurfacing However the community was quite fragmented with each research project being based on a particular and different set of assumptions and approaches Often these assumptions were not germane to

the research per se but were made simply because the research required a data model or query language with certain characteristics with the particular one chosen rather arbitrarily. It would be better in such circumstances for research projects to choose the same language. Unfortunately no existing language had attracted a following large enough to become the one of choice. In April 1992 Richard Snodgrass circulated a white paper that proposed that a temporal extension to SQL be produced by the research community. Shortly thereafter the temporal database community organized the ARPA NSF International Workshop on an Infrastructure for Temporal Databases which was held in Arlington TX in June 1993.

Interaction and Identity Hartmut B. Mokros, Scholarly interest in issues of self identity has exploded across disciplines within the humanities and social sciences in recent years. Common to these concerns are the assumptions that self identity is not an a priori not given or fixed but created in the process of communication. This also assumes that social institutions and values are produced and reproduced by individuals in interaction. To capture the essential characteristics of a person requires analysis of how the social and psychological intersect in moments of communication. *Interaction and Identity* contributes theoretically and empirically to contemporary scholarly interest in issues of identity. Chapters and contributors to this stand alone volume include Part Whole Discovery Stages of Inquiry by Thomas Scheff, Communication by Gregory Bateson, Internal Muzak: An Examination of Intrapersonal Relationships by Linda Lederman, The Constitution of Identity as Gendered in Psychoanalytic Therapy, Ideology and Interaction by Margaret Carr and The Reconstruction and Negotiation of Cultural Identities in the Age of Globalization by Getinet Belay. The multiple disciplines of social research with contemporary interest in identity are ably reflected in *Interaction and Identity*. The authors are drawn from eight disciplines: anthropology, communication, information science, linguistics, philosophy, psychoanalysis, psychology and sociology. This book will be invaluable to scholars in all these areas, above all in communication research, as such.

Entrepreneurship and Behavioral Strategy T. K. Das, 2020-05-18. This book series on behavioral strategy explores the role of psychology, organizational behavior and decision making in strategic management. It aims to balance the economics based view with individual oriented perspectives. The volume on entrepreneurship covers topics like risk behavior, team formation and disruptive innovations.

Behavioral Strategy T. K. Das, 2014-06-04. Behavioral Strategy: Emerging Perspectives explores the role of psychology, organizational behavior and decision making in strategic management. With contributions from leading scholars it covers topics like cooperative behavior, executive biases, organizational change, business modeling and strategic risk.

Heart of the Living God Michael G. Maness, 2004-06-23. Maness asks us to tie up our sneakers for we are going to have some fun as we hike into the Grand Canyon of Love. Love is the treasure of life. It is Love all the way. Nothing else really matters outside of Love. Best of all our Love will only get better in heaven. The treasured ability to have loving relationships is God's gift to us in our Imago Dei, the image of God we all share. Likewise what we know of Love this side of heaven is but a dusty image of what God experiences. I want to get personally involved, says Maness. Can we have a free will relationship with anyone, even God, if

all of what we do and think is settled I dont think so Love is greater than that and I shall prove that and that is indeed a Grand Canyon Manes brings some of the brain splitting complexities of this to light with good humor introduces dynamic foreknowledge and challenges Classical Theisms avoidance of Love And he exposes some foul play in the process Thats the first half of the book For those wanting to strike out on their own wanting to see more of the depth and diversity of the Grand Canyon the second half contains reviews of about 60 major authors a 4 000 Abysmal Bibliography and a huge index to just about everything in the book Maness has thrown a gauntlet before the Classical Theists So tie up your sneakers and take a hike with Michael G Maness as he walks with you into the Grand Canyon see more at www.PreciousHeart.net **The**
