Timeless architecture : 1 D. Cruickshank, *Timeless Architecture* Dan Cruickshank,1985 *Timeless* Patrick Ahearn,2018 *Timeless* reveals how Patrick Ahearn's historically motivated human scaled designs have advanced the art of place making in some of America's most affluent and storied destinations Whether carefully restoring century old landmarked townhouses in Boston's Back Bay or creating new homes that reimagine the local vernacular of Martha's Vineyard Ahearn demonstrates an unparalleled ability to combine the romance of traditional architecture with the ideals of modernism With his work he sensitively balances preservation with innovation to make buildings that feel truly timeless Dust jacket

The Environmental Tradition Dr Dean Hawkes,Dean Hawkes,2013-12-16 This text brings together a unique collection of writing by a leading researcher and critic which outlines the evolution of the environmental dimension of architectural theory and practice in the past twenty five years It deals with the transformation of the environmental design field which was brought about by the growth of energy awareness in the 1970s and 1980s and places environmental issues in the broader theoretical and historical context in architecture

The Victorian Palace of Science Edward J. Gillin,2017-11-09 The Palace of Westminster home to Britain's Houses of Parliament is one of the most studied buildings in the world What is less well known is that while Parliament was primarily a political building when built between 1834 and 1860 it was also a place of scientific activity The construction of Britain's legislature presents an extraordinary story in which politicians and officials laboured to make their new Parliament the most radical modern building of its time by using the very latest scientific knowledge Experimentalists employed the House of Commons as a chemistry laboratory geologists argued over the Palace's stone natural philosophers hung meat around the building to measure air purity and mathematicians schemed to make Parliament the first public space where every room would have electrically controlled time Through such dramatic projects Edward J Gillin redefines our understanding of the Palace of Westminster and explores the politically troublesome character of Victorian science

The Environmental Imagination Dean Hawkes,2019-11-07 *The Environmental Imagination* explores the relationship between tectonics and poetics in environmental design in architecture Working thematically and chronologically

from the eighteenth century to the present day this book redefines the historiography of environmental design by looking beyond conventional histories to argue that the environments within buildings are a collaboration between poetic intentions and technical means In a sequence of essays the book traces a line through works by leading architects of the nineteenth and twentieth centuries that illustrate the impact of new technologies on the conception and realisation of environments in buildings In this a consideration of the qualitative dimension of environment is added to the primarily technological narratives of other accounts In this second edition the book has been substantially rewritten and restructured to include further research conducted in the decade since the first edition A number of important buildings have been revisited in order to extend the descriptions of their environments and studies have been made of a number of newly studied significant buildings A completely new essay offers an environmental interpretation of Luis Barrag n s magical own house in Mexico City and the earlier studies of buildings by Peter Zumthor have been gathered into a single extended essay that includes a body of new research On the fiftieth anniversary of the publication of Reyner Banham s *The Architecture of the Well tempered Environment* the book concludes with a critical tribute to that seminal text *The Environmental Imagination* will appeal to academics and practitioners with interests in the history theory and technology of architecture *The Architects' Journal* ,1993 **Studies in the History of Services and Construction** James Campbell,Amy Boyington,Yiting Pan,Nina Baker,Michael Heaton,Michael Tutton,David Yeomans,Henrik Schoenefeldt,Michael Driver,2018 Building services are often overlooked in the history of architecture and engineering This volume presents 41 papers presented at the Fifth Annual Conference of the Construction History Society held at Queens College Cambridge from 6 8 April 2018 which cover a wide variety of topics on aspects of construction history and building services **The Architectural Review** ,1987 **EDN.** ,1982 Architecture and Cultural Values Maija Kärkkäinen,1991 **Electronic Design** ,1982 **New Pencil Points** Eugene Clute,Russell Fenimore Whitehead,Kenneth Reid,Elizabeth L.
