Fiet,2002-07-30 Entrepreneurs do much more than manage small businesses At the heart of entrepreneurship is the discovery process An idea is conceived and then exploited for profit But if the idea is neither useful nor unique its exploitation will generate only average profits Therefore the idea and the process that leads to its discovery are of the utmost importance to the success of any new venture Can the discovery process be taught or must one be born with the talent to unearth promising opportunities Fiet argues that entrepreneurial discovery can indeed be taught and he proposes a theory of the informational elements that constitute the discovery process Entrepreneurship as an academic discipline has often been

criticized for lacking intellectual rigor and a theoretical foundation Fiet supplies both in this scholarly book which approaches entrepreneurial competence from an academic perspective There are three primary characteristics of entrepreneurial competence tacit knowledge of an entrepreneur's field of endeavor which can be improved by trial and error the knowledge of decision rules that enable one to make rational informational investments based upon the signals of opportunities and the unequal distribution of entrepreneurial competence among the population Recognizing that entrepreneurs start out at different stages of competence Fiet asserts that anyone can improve using his book as a pedagogical aid This volume fills a void in the entrepreneurship literature which too often is indistinguishable from that which informs courses on small business management

Handbook of Entrepreneurial Dynamics William B Gartner, 2004-06-21 This important Handbook of Entrepreneurial Dynamics reports on the Panel Study of Entrepreneurial Dynamics PSED the most comprehensive scientifically representative study to date of nascent entrepreneurs The book is unique because the study identified individuals in the process of creating new businesses to understand how at its very source people move from considering the option of starting a new business to its actual founding This has never been done before in the history of entrepreneurship research I cannot recommend this book more strongly to entrepreneurship scholars and those interested in where entrepreneurs come from and how they move from their initial idea to new venture founding Claudia Bird Schoonhoven University of California Irvine This Handbook makes a terrific contribution to understanding entrepreneurship and new business creation Its 38 chapters report major findings from the Panel Study of Entrepreneurial Dynamics PSED an unprecedented research program involving more than a hundred researchers from 10 countries This Handbook is must reading for anyone interested in entrepreneurship research Andrew H Van de Ven Carlson School of Management University of Minnesota Entrepreneurial activity provides profound positive benefits across an important set of measures of social and economic well being much of it concentrated in new economic sectors such as information technology Yet even though entrepreneurship has been shown to provide many benefits it is surprising that there has not been a systematic study of the entrepreneurial process The Handbook of Entrepreneurial Dynamics The Process of Business Creation fills this gap by offering theories ideas and measures that can be used to explore and understand the factors that encompass and influence the creation of new businesses The chapters in the handbook provide the rationale for questionnaires used in the Panel Study of Entrepreneurial Dynamics PSED The PSED is a research program that was initiated to provide systematic reliable and generalizable data on important features of the new business creation process The PSED includes information on the proportion and characteristics of the adult population involved in efforts to start businesses the activities and characteristics that comprise the nature of the business start up process and the proportion and characteristics of those business start up efforts that actually become new businesses The handbook also describes the PSED data collection process provides documentation of the interview schedules codebooks data preparation and weighting

scheme as well as offers examples of how analyses of PSED data might be conducted The authors identify specific measures that can be used to operationalize theory as well as provide evidence from the PSED data sets on these measures reliability and validity The Handbook of Entrepreneurial Dynamics is ideal for a sizeable audience including graduate students academics and librarians in schools of business and management who need a comprehensive reference on business creation In addition researchers and policy makers at the federal state and local level will find this an invaluable reference covering all of the factors involved in new venture formation Key Features Considers categories of data not available prior to the PSED Includes a comprehensive overview of theories about new business formation Provides demographics of nascent entrepreneurs Analyzes the cognitive characteristics of nascent entrepreneurs Explores all of the processes of new business formation
