Verbal Complexes Hilda Judith Koopman, Anna Szabolcsi, 2000 In this book Hilda Koopman and Anna Szabolcsi propose a unified analysis of restructuring constructions in Hungarian Dutch and German that involves only overt phrasal movement and derives variation from the varying sizes of pied piping constituents Restructuring verbs in Hungarian exhibit three patterns the will begin up climb and the up will begin climb orders common in Dutch and the up climb begin will order common in German Traditionally these have been analyzed as involving no movement or covert movement phrasal movement and head movement respectively The first goal of this book is to develop a unified analysis where 1 the same features are checked in all three orders 2 all feature checking is achieved by overt movement and 3 all three types involve phrasal movement The second goal is to account for the significant variation across Hungarian Dutch and German which is argued to arise from the varying sizes of the constituents pied piped in the course of movement In addition to its novel theoretical claims the book presents the first systematic description of Hungarian complex verbs and the first comparison of West Germanic and Hungarian Current Studies in Linguistics No 34 Complex Predicates Stefan Müller, 2002-01 Complex Predicates examines a number of linguistic phenomena including auxiliary and verb combinations causative constructions predicatives depictive secondary predicates and particle and verb combinations and uses scrambling and fronting data to determine that all except the depictive secondary predicates should be treated as complex predicates Müller's analysis of inflection and derivation is compatible with syntactical analysis of particle verbs as a byproduct it also solves the particle verb bracketing paradox often discussed in the literature Grammatical gaps: definition, typology and theory Thomas Strobel, Helmut Weiß, 2023-12-11 Grammatiken sind metaphorisch gesprochen Anweisungen zum richtigen Gebrauch einer Sprache Interessanterweise zeigen Grammatiken offenbar Lücken die dadurch entstehen dass für bestimmte Bereiche Regeln bzw Formen ganz fehlen oder dass sich einzelne Regeln widersprechen und der daraus resultierende Konflikt deren Anwendung verhindert Grammatische Lücken auf deren Relevanz für eine realistische Grammatiktheorie wohl zuerst Marga Reis hingewiesen hat sind in den letzten Jahren schon vereinzelt in den Fokus der Forschung geraten Das Sonderheft versammelt Arbeiten zu verschiedenen Arten von Lücken und zeigt damit wie ertragreich und wichtig die Erforschung grammatischer Lücken sein kann Grammars are metaphorically speaking instructions for the correct use of languages One might expect that grammars are complete i.e. that they provide an appropriate solution for each utterance context Interestingly however grammars seem to show gaps which are caused by the fact that rules or forms in certain domains are missing completely or that individual rules contradict each other and that the resulting conflict prevents their application Grammatical gaps whose relevance for a realistic theory of grammar was probably first pointed out by Marga Reis have come into the focus of research in recent years The present special issue collects papers on different kinds of gaps and shows how fruitful and important the investigation of grammatical gaps can prove to be Inhalt Introduction Ralf Vogel Grammatical gaps
