Work Patterns And Capital Utilization An International Comparative Study:

Work Patterns and Capital Utilisation D. Anxo, Gerhard Bosch, Derek Bosworth, Gilbert Cette, Thomas Sterner, Dominique Taddei, 2013-03-09 Edmond Malinvaud This book provides a most welcome survey of what statisticians and economists know about an aspect of production that is difficult to precisely characterize but matters a lot for both its importance on economic performance and its social implications That such a survey is timely cannot be overemphasized the point is well argued in the introduction to the book which shows how discussions of the last decades stressed the importance of capital operating time as an economic variable in a series of distinct but interrelated topics from growth theory to employment policies Nowadays still more than ever in the past production not only requires capital as well as labour but also depends on varied and complex forms of work organization which tie more or less closely to one another the uses of the two main factors In industry and services labour needs many pieces of capital for efficient production some operating permanently others assisting when needed Many even among the most modern equipments cannot well function without constant guidance or control by human labour The cost of interrupting some industrial processes is so high as to impose continuous operation The timing for the provision of many services has to be patterned in accordance with the rhythms of activities or requirements of those demanding these services and so on This interplay is so complex that its particularities were and still are most often fully neglected in statistical information and in economic analysis
