## **Brain Power Enrichment: Level One, Book Two-Teacher Version**

**Grades 4-6** Karine Rashkovsky, Reuven Rashkovsky, 2008-03-19 Brain Power Enrichment Programs aim to develop problem solving abilities in students who wish to improve their skills. Additionally, the programs may provide challenging, stimulating, and inspirational learning experiences through engagement with problem solving for gifted students. The Student Versionbook accompanies a Level One student through his/her second semester of the problem solving program or it may be used independently as a problem solving workbook. However, this Teacher Version may be used by a teacher or tutor as it has, in addition to the content of the Student Version, short instructions for each lesson as well as answers to problems. All Brain Power programs are based on a step-by-step approach which enables students to understand problems of increasing complexity. Level One begins to equip students typically in grades 4 to 6 with various problem solving strategies and techniques and supports the application of these skills to math, language arts, study habits, and the general learning process. In Level One, students are introduced to four critical steps in problem solving: 1. Understanding the problem, 2. Defining a plan or strategy, 3. Solving the problem, 4. Checking the answer. The implications for improving one's problem solving skills are numerous. These include a more positive attitude toward math and science, improved thinking flexibility and creativity in all subject areas, as well as increased success in academic, gifted university admissions, and professional program tests, many of which are designed with an emphasis on assessing higher order thinking skills. Moreover, knowledge of a range of problem solving strategies coupled with experience in their application have benefits which transcend the classroom and enter the realm of professional, social, and intellectual accomplishment.
