This book constitutes the proceedings of the 29th International Symposium on Distributed Computing DISC 2015 held in Tokyo, Japan in October 2015. The 42 full papers presented in this volume were carefully reviewed and selected from 143 submissions. The papers feature original contributions to theory, design, implementation, modeling, analysis, or application of distributed systems and networks. A number of 14 two-page brief announcements are included in the back matter of the proceedings. **The Time Dominators** Antonio Collado, 1991 **Group Psychotherapy** Baruch Levine, 1979

Dominator, the Story of the Consolidated B-32 Bomber Stephen Harding, James I. Long, 1984 **New Age Magazine**, 1920 **Proceedings of the 1986 International Conference on Parallel Processing**, 1986 *Indian Antiquary*, 1920 Consolidated B-32 Dominator William Wolf, 2006. Over the years the B-32 has been described only in a small number of magazine articles and in a booklet that have generally given a superficial and incomplete account, maligning the bomber fairly or not as a mediocre design besieged with developmental problems and a lackluster combat record. Consolidated B-32 Dominator: The Ultimate Look from Drawing Board to Scrapyard is the definitive description and appraisal of this neglected bomber's development, testing, manufacture, and combat experience. The author used company design and production information, flight and test evaluations, along with previously unexplored Flight Manuals and Consolidated Vultee Erection and Maintenance Manuals. From rare microfilm of original material and insights and personal narratives of the personnel involved, Wolf has gathered information on the pre-combat testing and all the combat missions of the bomber in the Pacific.
