Time For Predators:

New perspectives and emerging directions in predator-prey functional response research: Hommage to C.S. Holling (1930- 2019) Thomas John Hossie, Dennis Murray, 2023-07-26 Escaping From Predators William E. Cooper (Jr.), Daniel T. Blumstein, 2015-05-28 Bringing together theory and reality of prey escape from predators this book benchmarks new and current thinking in escape ecology **Biomimicry for Optimization, Control, and Automation** Kevin M. Passino, 2005-09-08 Biomimicry uses our scientific understanding of biological systems to exploit ideas from nature in order to construct some technology In this book we focus on how to use biomimicry of the functional operation of the hardware and software of biological systems for the development of optimization algorithms and feedback control systems that extend our capabilities to implement sophisticated levels of automation The primary focus is not on the modeling emulation or analysis of some biological system The focus is on using bio inspiration to inject new ideas techniques and perspective into the engineering of complex automation systems There are many biological processes that at some level of abstraction can be represented as optimization processes many of which have as a basic purpose automatic control decision making or automation For instance at the level of everyday experience we can view the actions of a human operator of some process e.g the driver of a car as being a series of the best choices he or she makes in trying to achieve some goal staying on the road emulation of this decision making process amounts to modeling a type of biological optimization and decision making process and implementation of the resulting algorithm results in human mimicry for automation There are clearer examples of biological optimization processes that are used for control and automation when you consider nonhuman biological or behavioral processes or the internalology of the human and not the resulting external behavioral characteristics like driving a car For instance there are homeostasis processes where for instance temperature is regulated in the human body *A Time of Predators* Joe Gores, 1971-01-01 *Periodic Oscillations in Lake Erie* Frederick Hartzler Krecker, 1928 *Digital Organisms in a Virtual Ecosystem Design and Implementation* Zhen Lei, 2004 **American Game** ,1930 *The American Naturalist* ,2007 **Animal Behavior** Tim Halliday, 1994 Provides a look at the fascinating activities of all types of animals from birth to maturity as they attract a mate care for their young find food and shelter and defend themselves written a team of international experts *Ecology* ,1925 **Annual Report - Entomological Society of Ontario** Entomological Society of Ontario, 1921 Circular ,1928 **Fisheries Bulletin** New Zealand.
