Tissue Interactions During Organogenesis:

Tissue Interactions During Organogenesis Étienne Wolff,1970 **Tissue Interactions in Development** Norman K. Wessells,1973 *Molecular Mechanisms of Cell and Tissue Interactions During Early Organogenesis* Seppo Vainio,1992

Cell Interactions in Differentiation Marketta Karkinen-Jaaskelainen,2012-12-02 Cell Interactions in Differentiation is a collection of papers presented at the Sixth Sigrid Juselius Foundation Symposium held in Helsinki Finland in August 1976 Contributors discuss cell interactions during differentiation particularly referring to the problem of embryonic induction They also consider how a cell becomes adjusted to the synchronized development of an entire multicellular organism so as to express its genetic information at a strictly controlled time and place This volume is organized into five sections encompassing 30 chapters and begins with an overview of embryonic cells and their two fundamental properties Cells are not necessarily predetermined and can be experimentally diverted from their normal developmental pathway and those within an embryonic organism require extrinsic messages to express their developmental capacities The next chapters focus on early determinative events in embryogenesis touching on topics such as the genetic aspects of cell type determination interactions between embryonic cells during the early development of the mouse and the differentiation of teratocarcinoma stem cells in vitro The reader is then introduced to positional information and morphogenetic signals the biological specificity of morphogenetic tissue interactions and the molecular mechanisms underlying cell contact interactions The remaining chapters explore some of the most important conceptual and methodological approaches to the problems of cell cell recognition and the integration of cells into multicellular systems This book will be of interest to scientists and investigators in developmental biology and related fields Cell Lineage and Fate Determination Sally A. Moody,1998-10-29 Cell Lineage and Fate Determination provides a comprehensive view of the mechanisms regulating cell lineage and fate determination in an effort to understand how the fertilized egg is transformed into a complex of specialized tissues It presents basic information on eight different animal models and recent developmental biological research done in each model The book provides a focused forum presenting key information for researchers studying various aspects of developmental and cellular biology Extensive use of tables and black and white and color figures helps illustrate each model The book concludes by discussing future goals for bringing cellular molecular and genetic research to clinical applications and tissue replacement therapies Key Features Presents eight different animal models Provides a focused forum on cell fate determination that provides comprehensive and key information for researchers Illustrates the transitional relationship between researchers and clinicians Includes the extensive use of tables and color figures **Developmental Biology and Cancer** Gisele M. Hodges,Charles Rowlett,2024-12-20 This book addresses possible analogies between cancer and developmental biology An international group of experts provides a multidisciplinary approach allowing biological or clinical scientists involved with cancer research to integrate specific information from diverse areas Five concepts of cancer are presented and

developmental biology is reviewed at five levels These are integrated in discussions of failure in organisation as a basis of cancer and its control The book will be a valuable reference for both newcomers as well as experienced biological and clinical scientists

Magill's Survey of Science: Muscular contraction and relaxation-Sexual reproduction in plants Frank Northen Magill,1991 Provides the general reader with insight into scientific topics in the life sciences

Postimplantation Development in the Mouse Derek J. Chadwick,Joan Marsh,2008-04-30 Examines the establishment of the germ layers and other cell lineages in the early embryo including details of cell movements during the beginning stages of primitive streak formation Discusses patterns of gene expression during the development of such tissues as the limb bud skeletal muscle and the central nervous systems placing special emphasis on commitment to particular cell types Although it concentrates on the mouse as an example of mammalian development chick amphibian and Drosophila embryogenesis are employed whenever these organisms are more applicable to the study of a particular problem

Biology of the Integument J. Bereiter-Hahn,A.G. Matoltsy,K.S. Richards,2013-04-17 The integument plays an important role in the survival of meta zoans by separating and protecting them from a hostile environ ment Its function ranges from protection against injury and in fection participation in the regulation of body temperature and water balance to respiratory activity monitoring of the environ ment and production of signals related to behaviour All these result from specific structural biochemical and physiological properties of intra and extracellular components of the integu ment Thus its characterization can be best accomplished by a multidisciplinary approach with authors specialized in different fields of science This multi author book in two volumes provides an up to date survey of the literature The first volume deals with the integument of invertebrates the second with that of vertebrates both organized primarily on a phylum basis As the level of knowledge on the integument of phyla differs considerably the information provided is correspondingly either limited or con densed For some of the smaller groups of invertebrates little information is available as often only a few electron micrographs are to be found in the literature on the other hand from the large body of knowledge existing for vertebrates particularly for mammals no complete overview can be provided but publica tions giving access to further information have been reviewed critically
