Just Green Enough Winifred Curran, Trina Hamilton, 2017-12-12 While global urban development increasingly takes on the mantle of sustainability and green urbanism both the ecological and equity impacts of these developments are often overlooked One result is what has been called environmental gentrification a process in which environmental improvements lead to increased property values and the displacement of long term residents The specter of environmental gentrification is now at the forefront of urban debates about how to accomplish environmental improvements without massive displacement In this context the editors of this volume identified a strategy called just green enough based on field work in Greenpoint Brooklyn that uncouples environmental cleanup from high end residential and commercial development A just green enough strategy focuses explicitly on social justice and environmental goals as defined by local communities those people who have been most negatively affected by environmental disamenities with the goal of keeping them in place to enjoy any environmental improvements It is not about short changing communities but about challenging the veneer of green that accompanies many projects with questionable ecological and social justice impacts and looking for alternative sometimes surprising forms of greening such as creating green spaces and ecological regeneration within protected industrial zones *Just Green Enough* is a theoretically rigorous practical global and accessible volume exploring through varied case studies the complexities of environmental improvement in an era of gentrification as global urban policy It is ideal for use as a textbook at both undergraduate and graduate levels in urban planning urban studies urban geography and sustainability programs

Crime, Justice and Discretion in England 1740-1820 Peter King, 2000-09-28 The criminal law has often been seen as central to the rule of the 18th century landed elite in England This book presents a detailed analysis of the judicial process of victim s reactions pretrial practices policing magistrates hearings trials sentencing pardoning and punishment using property offenders as its main focus The period 1740 1820 the final era before the coming of the new police and the repeal of the capital code emerges as the great age of discretionary justice and the book explores the impact of the vast discretionary powers held by many social groups It reassesses both the relationship between crime rates and economic deprivation and the many ways that vulnerability to prosecution varied widely across the lifecycle in the light of the highly selective nature of pretrial

negotiations More centrally by asking at every stage who used the law for what purposes in whose interests and with what effects it opens up a number of new perspectives on the role of the law in eighteenth century social relations The law emerges as the less the instrument of particular elite groups and more as an arena of struggle of negotiation and of compromise Its rituals were less controllable and its merciful moments less manageable and less exclusively available to the gentry elite than has been previously suggested Justice was vulnerable to power but was also mobilised to constrain it Despite the key functions that the propertied fulfilled courtroom crowds the counter theatre of the condemned and the decisions of the victims from a very wide range of backgrounds had a role to play and the criteria on which decisions were based were shaped as much by the broad and more humane discourse which Fielding called the good mind as by the instrumental needs of the propertied elites *Vegetable Thieves and Murderers* Bradford.
